

CHILLING HOURS DEFINED: Chilling refers to the number of hours, 45 degrees F and under, during the dormancy period. All fruit and nut trees need a specific amount of chilling hours before they will produce fruit. The amount varies with each variety and the hours need not be continuous. In the description of the fruit tree, 800 hours (for example) means it needs that many minimum hours of chilling time.

FRUIT TREES

APPLE

ARKANSAS BLACK SPUR APPLE Large, later season. Dark red skin, high quality even when summer nights are warm. For dessert and cooking. Keeps many months. 800 hours. Partly self-fruitful.

BRAEBURN APPLE New from New Zealand. Superb late season fruit. Very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours (est.). Self-fruitful.

DOLGO CRABAPPLE Long-time favorite all-purpose crabapple. Large, fragrant white flowers. Fruit makes tasty, bright-red jelly. Vigorous, upright, open tree to 30 feet x 25 feet, depending on conditions. Resistant to scab, rust, mildew, fireblight. 500 hours. Self-fruitful.

FUJI APPLE California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull, reddish-orange skin, sometimes russeted. Ripe mid-September. Excellent Pollinizer for other apple varieties. Less than 500 hours. Self-fruitful.

GALA APPLE (original Gala) Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish over yellow. Early harvest. Good Pollinizer for other varieties. Adapted to cold and warm winter climates. Less than 500 hours. Self-fruitful.

GHOST APPLE Totally white skin, sweet sub-acid flavor. A heat-loving apple, Ghost harvests at the beginning of July in central CA. Chill requirement of 500 hours. Mid-blooming apple required as pollinizer.

GOLDEN DELICIOUS APPLE (Yellow Delicious) Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Mid-season harvest, Sept in Central Cal. 700 hours. Self-fruitful.

GRANNY SMITH APPLE Large, late, green, crisp, tart, excellent keeper. Requires long chilling. Thrives in hot climates. 600 hours. Good Pollinizer for other apples. Self-fruitful.

GRAVENSTEIN APPLE (Red Gravenstein) Famous for sauce and baking, also used fresh. Crisp, juicy flavor, tart green with red stripes. Early bloom, early harvest. 700 hours. Pollen sterile. Pollinizer required – Empire, Fuji, Gala, Red Delicious.

HONEYCRISP APPLE Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy, with aromatic flavor. Striped red over yellow color. Stores well. Ripens in late September to late October. Pollinated by Fuji, Gala, or Golden Delicious.

JONAGOLD APPLE Superb flavor – connoisseur's choice. A cross of Jonathan and Golden Delicious. Yellow with red-orange blush. Crisp, juicy, sub-acid, all purpose. 700-800 hours. Pollinated by Fuji, Gala, Granny Smith, or Red Delicious.

LIBERTY APPLE Disease-resistant, & cold hardy. Resists scab, rust, mildew, fireblight. Solid red. Crisp, rich sprightly flavor. Fresh or cooked. Early fall harvest. 800 hours. Self-fruitful

MUTSU (CRISPIN) APPLE A favorite of connoisseurs: very large, crisp, and flavorful. Late September/October harvest. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 600 hours. Pollen sterile - pollinated by Red Delicious, Granny Smith, Fuji, Gala.

PINK LADY APPLE (Cripps Pink) New hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late Oct in Central Cal. Self-fruitful. 4-500 hours.

PINK PEARL APPLE Unusual pink-fleshed, highly aromatic fruit. Medium size, cream and pale green skin, sometimes blushed red. Tart to sweet-tart, depending on time of picking. Early fall harvest. Good keeper. Makes colorful, tasty applesauce. 600 hours. Pollinizer required.

RED DELICIOUS APPLE (Bisbee spur) Sweet, crisp, flavorful - perhaps the best Red Delicious. Early fall harvest. Small, compact tree. Good Pollinizer for most other apples. 700 hours. Pollinated by Liberty, Granny Smith, Golden Delicious, Fuji, Gala.

RED FUJI APPLE (BC#2) Redder-skinned sport of Fuji. Sweet, very crisp, and flavorful; excellent keeper. Ripe Sept-Oct in Central Cal. Excellent Pollinizer for other apples. Self-fruitful.

ROME BEAUTY APPLE Late blooming, a good choice where hard freezes in late spring are common. Large, round, red, used primarily for cooking. Heavy bearing. Late harvest. 1000 hours. Self-fruitful.

SIERRA BEAUTY APPLE Favorite late apple in No. Calif. Yellow with red blush, rich sprightly flavor, moderately sweet. Excellent fresh or cooked. 700-800 hours. Self-fruitful.

TYDEMAN'S LATE ORANGE This apple has consistently better quality and flavor in hot summer climates. Good keeper with reddish-orange stripes over greenish-yellow color. Yellow flesh is firm and juicy. 800-1000 hours. Pollinizer required.

WINESAP APPLE (Stayman Double Red Winesap) Long-time favorite late red apple. Juicy, smooth texture. Lively flavor, used fresh or cooked. 800 hours. Pollen sterile. Pollinated by Red or Golden Delicious, Fuji, Gala, Liberty.

YELLOW NEWTON PIPPIN APPLE Yellow-green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest till cheeks are blushed yellowish green (late Oct./early Nov. in Central Cal). Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. 700 hours. Self-fruitful.

APRICOT

BLENHEIM (ROYAL) APRICOT All-purpose freestone, sweet, aromatic, flavorful. Long the #1 apricot in California. Early bloom. Late June harvest in Central Calif. 500 hours. Self-fruitful.

CANADIAN WHITE BLENHEIM APRICOT Syrupy sweet white flesh with firm texture. Taste test winner. 500-700 hours. Partly self-fruitful. Biggest crop if cross-pollinated.

HARCOT APRICOT From Canada. Frost hardy late bloom. Resists brown rot and powdery mildew. Medium to large fruit ripens early to mid-June in Central Cal. Sweet, juicy, rich flavor - one of the best. 700 hours. Self-fruitful.

HARGLOW APRICOT Late-blooming, productive tree, proven producer in coastal Northwestern climates. Medium size, bright orange fruit sometimes blushed red. Orange freestone flesh is firm, sweet, flavorful. Resistant to perennial canker and brown rot, resists cracking. 800 hours. Self-fruitful.

PUGET GOLD APRICOT Proven producer of large, flavorful fruit in Western Wash. Recommended for climates where spring rains and frosts limit apricot culture. August harvest. 600 hours. Self-fruitful.

CHERRY

BING CHERRY Large, firm, juicy, sweet, nearly black when ripe - superb flavor, #1 cherry. Mid-season. Large, vigorous tree. 700 hours. Pollinized by Black Tartarian, Van, Rainier. Also Stella in colder climates.

BLACK TARTARIAN CHERRY Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollinizer required - interfruitful with all popular sweet cherries.

CRAIG'S CRIMSON CHERRY Taste test winner. Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard. Mid-season. 800 hours.

MONTMORENCY SOUR CHERRY Large, light red skin with yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy and very heavy bearing. 700 hours. Self-fruitful.

LAPINS CHERRY Self-fruitful dark red sweet cherry. Large, firm, good flavor. Similar to Van in color, Bing in shape. Great pollinator for Bing. Sometimes sold as "Self-fruitful Bing." 800 hours.

RAINIER SWEET CHERRY Large, yellow with red blush. Sweet and flavorful - superior to Royal Ann. Very cold hardy. Mid-season harvest. 700 hours. Pollinizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

ROYAL CRIMSON CHERRY Low chill cherry. Bright red, sweet, superb flavor. Self fruitful. Sold last year as 6GM25.

ROYAL RAINIER CHERRY Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner.

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 www.frontyardnursery.com

(2)

Ripens early. Moderate chill requirement, 600-700 hours. Pollinizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

UTAH GIANT CHERRY Best sweet cherry, according to Utah folks. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollinizer required. Bing, Lambert, Rainier, Van.

VAN CHERRY Dark flesh, semi-sweet flavor. This cherry is heavy bearing, cold hardy, and resists cracking. Large fruit, very reliable. 900 hours. Pollinizer required: Bing, Black Tartarian, or Stella. Excellent Pollinizer for other sweet cherries.

FIG

BLACK JACK FIG (AVAILABLE POTTED ONLY) Large, purplish-brown figs with sweet, juicy, strawberry-red flesh. Harvest Aug to Oct in Central Cal. Naturally small tree (semi-dwarf). 100 hours. Self-fruitful.

BLACK MISSION FIG (AVAILABLE POTTED ONLY) The favorite. Purplish-black skin, strawberry colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Fresh/dry/can. 100 hours. Self-fruitful.

CHICAGO HARDY FIG (AVAILABLE POTTED ONLY) Purple brown fig with great flavor. Good cold tolerance, can die back to the ground and come back and fruit the next season. Fruit produces on next season's summer growth. Self-fruitful.

DESERT KING FIG (AVAILABLE POTTED ONLY) Large green fruit with strawberry flesh. Excellent quality. Does best in cooler coastal climate, and does well in colder climates or higher elevations. Sets a large early crop between late June to August. Has a second crop in warm areas. Self-fruitful.

FLANDERS FIG (AVAILABLE POTTED ONLY) Highly productive, violet-striped fruit with white flecks. Richly flavored amber flesh that is resistant to splitting. 100 hours. Self-fruitful.

IMPROVED BROWN TURKEY FIG (AVAILABLE POTTED ONLY) Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted, coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful.

ISCHIA FIG (AVAILABLE POTTED ONLY) Green skin flushed with purple. White to light strawberry colored flesh. Heavy crop of small sized, short necked tasty, sweet fruit.

LATTERULA FIG (AVAILABLE POTTED ONLY) Also known as Italian Honey Fig. Greenish yellow fruit; sweet, amber, honey colored flesh. Good for fresh eating, canning or drying. Ripens two crops in most years during July and Sept.

PETER'S HONEY FIG (AVAILABLE POTTED ONLY) Light yellow-green fruit with outstanding sweet, dark amber flesh. Originally from Sicily. Self-fruitful.

VIOLETTE de BORDEAUX (AVAILABLE POTTED ONLY) Large, almost black, fruit with a very deep red pulp. Produces two crops. Excellent fresh or dried. Good for container culture or small spaces.

NECTARINE

ARCTIC JAY WHITE NECTARINE Taste test winner. Very attractive, firm, freestone fruit is richly flavored, with a balance of sugar and acid. 800 hours. Self-fruitful.

DOUBLE DELIGHT NECTARINE Sensational fruit - consistently the best flavored yellow nectarine - plus magnificent, double pink flowers. Dark red-skinned freestone fruit is sweet with unusually rich flavor. Very high scoring in taste-tests.

Heavy-bearing tree. Harvest in July in Central Cal. 400-500 hours. Self-fruitful.

FANTASIA NECTARINE Popular, large, yellow freestone. Early harvest fruit is firm, ripe, and tangy; late harvest is sweet with rich flavor. High scoring in taste tests. 500 hours. Self-fruitful.

FLAVORTOP NECTARINE Firm, yellow free stone with excellent quality. Large, showy blossoms. Ripens mid-July. Susceptible to bacterial spot and tender to winter cold. 650 hours. Self-fruitful.

FRECKLE FACE NECTARINE Delicious yellow flesh fruit with speckled skin. Harvest mid-May in Central Cal. Taste Test Winner. Self-fruitful.

HARKO NECTARINE Sweet, firm, yellow semi-freestone. Cold hardy with showy, large, single pink blossoms. Ripens with Redhaven Peach in early July. Tolerant of bacterial spot and brown rot. 800 hours. Self-fruitful.

HEAVENLY WHITE NECTARINE Very large, firm, white-fleshed freestone. Superb acid- sugar balance, and rich, complex flavor - connoisseur's delight. Dull red and cream-colored skin. Mid-July in Central Cal. 650 hours. Self-fruitful.

JUNEGLO NECTARINE Delicious, full-flavored early season fruit ripens late June in Central Cal. Semi-freestone when soft-ripe. Winter & frost hardy. 700 hours. Self-fruitful.

LIZ'S LATE NECTARINE Sprightly-sweet, intense, spicy flavor - the state of the art in fruit breeding. Late August /early Sept harvest in Central Cal. 600-700 hours. Self-fruitful.

MERICREST NECTARINE Very cold hardy, frost hardy, late bloomer. Crops after sub-zero winters. Large, red-skinned yellow freestone, rich tangy flavor. Highly recommended. Mid-July harvest in Central Cal. 800 hours. Self-fruitful.

OLIVE

MISSION OLIVE AVAILABLE POTTED ONLY The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollinizer.

PEACH

ARCTIC SUPREME WHITE PEACH Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality enjoyed a short while after picking. Harvest late July/early August in Central Cal. 700 hours. Self-fruitful.

OUT

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off - buy 20-99 Trees, get 15% off - Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 www.frontyardnursery.com

AUTUMN FLAME PEACH NEW THIS YEAR! Large size, round, fair to good flavor, very little blush over yellow skin.

BABCOCK PEACH Long time favorite white-fleshed freestone. Sweet and juicy, aromatic, low acid. Ripens mid-July in Central Cal. Widely adapted. 250-300 hours. Self-fruitful.

DIAMOND PRINCESS PEACH NEW THIS YEAR! Medium size, vigorous, hardy, very productive and regular bearing tree. The freestone fruit is uniformly large size, of globose shape, with very firm texture and a delicious flavor balance of acid and sugar. Ripens early July.

DOUBLE JEWEL PEACH Flowering/fruiting peach for home orchard and landscape. Profuse, showy, double pink flowers. Late blooming, but early harvest – late June in Central Cal. Large, richly flavored, yellow freestone. Self-fruitful.

ELBERTA PEACH Famous yellow freestone. Classic, rich, peach flavor: high scoring in taste tests. Use fresh, canned, cooked. Ripe late July (early Aug) in Central Cal, up to 3-4 weeks later in colder climates. 800 hours. Self-fruitful.

FAIRTIME PEACH An old favorite, yellow peach with nice red blush. Firm texture and very tasty. Ripens in early Sept. 500-600 hours. Self-fruitful.

FROST PEACH Resistant to peach leaf curl (10-year trials at Washington State U.). Delicious yellow freestone. Slight red blush over greenish yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July harvest. Showy pink bloom in spring. 700 hours. Self-fruitful.

INDIAN BLOOD CLING PEACH Large, late-season canning peach. Red-skinned, red flesh, rich flavor. Blooms late, sets heavy crops. 800 hours. Self-fruitful.

INDIAN FREE PEACH Taste test winner at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinate.

JULIET'S PRIZE PEACH NEW THIS YEAR! Large and sweet, with bright white flesh and big red/pink skin, Self-fruitful.

JULY (KIM) ELBERTA PEACH Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 500 hours. Self-fruitful.

KAWEAH PEACH High yield, large fruit, delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. 500 hours. Mid-late season. Self-fruitful.

O'HENRY PEACH Popular fresh market yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-Aug in Central Cal. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

REDHAVEN PEACH World's most widely planted peach. High quality yellow freestone. Ripens early July in Central Cal. Frost hardy. Fresh/freeze. 800 hours. Self-fruitful.

OUT

RIO OSO GEM PEACH Favorite late yellow freestone. Large, sweet, rich flavor, like J.H. Hale. Fresh/freeze. Small tree. Showy bloom. Mid-August in Central Cal. 800 hours. Self-fruitful.

SNOW BEAUTY WHITE PEACH NEW THIS YEAR! Low acid, high sugar, tantalizing flavor. Large, very firm, red skin. Taste test winner. Mid-July harvest in Central Cal. 750-850 hours. Self-fruitful.

SUMMER LADY PEACH NEW THIS YEAR!

Large size, shape similar to O'Henry, good flavor, bright red skin, very good firmness, good producer, a very promising variety. Ripens Late July. Self-fruitful.

PEAR

BARTLETT PEAR World's most popular pear. Early mid-season, about August 1st. High quality, tolerates hot summers. 800 hours. Self-fruitful in most climates of the western U.S. Elsewhere pollinated by Bosc, D'Anjou, Winter Nelis.

COMICE PEAR The gift pack pear. Sweet, aromatic, fine texture, superb flavor & quality - one of the best. Short neck, greenish-yellow skin with red blush. Mid-Sept harvest. 600 hours. Self-fruitful in most of western U.S., or plant with Bartlett.

SENSATION RED BARTLETT PEAR High quality Bartlett-type fruit with attractive red skin. Relatively small tree. 700 hours. Self-fruitful in arid West.

WARREN PEAR Excellent quality dessert pear and highly resistant to fire blight. Med. to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Harvest mid-August. Cold hardy to -20 deg. 600 hours. Self-fruitful.

ASIAN PEAR

20TH CENTURY ASIAN PEAR (Nijisseiki, apple pear) Juicy, sweet, mild-flavored fruit is crisp like an apple. Early to mid-Aug harvest in Central Cal. Keeps well. Easy to grow, heavy bearing small tree. 450 hours. Self-fruitful, or pollinated by Shinseiki, Bartlett, or other.

HOSUI ASIAN PEAR Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-Aug in Central Cal. 450 hours. Pollinated by Shinko, Chojuro, Bartlett, or 20th Century.

SHINSEIKI ASIAN PEAR Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early Aug in Central Cal. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 350-450 hours. Self-fruitful.

PLUM & PRUNES

BURGUNDY PLUM Maroon-colored skin and flesh. Sweet with little or no tartness and a very pleasing, mild flavor. High taste test scores. harvest mid-July to mid-Aug in Central Cal. Very productive. Narrow, upright habit. 400 hours. Self-fruitful.

ELEPHANT HEART PLUM Home-orchard favorite – large, heart-shaped fruit with sweet, juicy, rich flavor, firm red flesh. Dark reddish-purple mottled skin. Long harvest season -Sept in Central Cal. Hardy, heavy-bearing. 500 hours. Pollinate with Beauty or Santa Rosa.

EMERALD BEAUT PLUM One of the highest-rated plums in tastings at Dave Wilson Nursery. Light green skin, yellow to orange freestone flesh. Harvest begins late Aug. in Central Cal. Ripe fruit continues to sweeten, becomes exceptionally sweet, but remains crisp and crunchy. 600-700 hours. Pollinizer required: Beauty, Burgundy, Late Santa Rosa, Flavor King Pluot.

FRENCH IMPROVED PRUNE California's commercial prune. Reddish-purple skin, dark amber flesh. Very sweet, high quality fruit. Dessert/canned/dry. 800 hours. Self-fruitful.

GREEN GAGE PLUM European plum. Long-time favorite for dessert, cooking, canning. Tender, juicy, rich flavor. Ripens late summer. Relatively small tree. 500 hours. Self-fruitful.

ITALIAN PRUNE Large, purple skin, free stone. Rich flavor, very sweet when ripe – fresh, dried or canned. Vigorous, cold hardy tree. Late bloom. 800 hours. Self-fruitful.

LATE SANTA ROSA PLUM Medium to large reddish-purple skin, amber flesh. Tart-sweet with rich flavor when fully ripe. Ripe about one month after Santa Rosa. 500 hours. Self-fruitful.

SANTA ROSA PLUM Most popular plum in California. Juicy, tangy, flavorful. Reddish-purple skin, amber flesh tinged red. Late June in Central Cal. 300 hours. Self-fruitful.

SATSUMA PLUM Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollinated by Santa Rosa or Beauty.

WEeping SANTA ROSA SEMI DWARF PLUM One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit - long limbs bow gracefully to ground. Easily espaliered. 400 hours. Self-fruitful.

PLUOTS – See HYBRIDS (next page)

POMEGRANATE

AC SWEET *POTTED ONLY* Flavor is sweet and refreshing, seeds are soft and edible. Ripe fruit can hang for weeks without splitting. Very hardy plant will take temperatures to below zero. One of Utah's favored varieties. Required chill hours 100-200. Self-fruitful.

ARIANA POMEGRANATE *NEW THIS YEAR! POTTED ONLY* Sweet-tart with great flavor. Medium to large fruit has red skin,

dark red arils and very soft seeds. Ripens late September to mid October. 100-200 hours. Self-fruitful.

HONEYCRISP APPLE DWARF Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy, with aromatic flavor. Striped red over yellow color. Stores well. Ripens in late September to late October. Grows 9-10 feet tall. Pollinated by Fuji, Gala, or Golden Delicious.

PIXIE COT APRIOT Genetic Dwarf Compact tree with medium sized fruit of fine quality. Ripens around early June. 600 hours. Self-fruitful.

BING CHERRY Genetic Dwarf Large, firm, juicy, sweet, nearly black when ripe - superb flavor, #1 cherry. Mid-season. Large, vigorous tree. Grows 10-15 feet tall. 700 hours. Pollinized by Black Tartarian, Van, Rainier. Also Stella in colder climates.

CRAIG'S CRIMSON CHERRY Genetic Dwarf Taste test winner. Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mid-season 10-15 feet tall. 800 hours.

LAPINS CHERRY Genetic Dwarf Self-fruitful dark red sweet cherry. Large, firm, good flavor. Similar to Van in color, Bing is shape. Great pollinator for Bing. Sometimes sold as "Self-fruitful Bing". Grows 10-15 feet tall. 800 hours.

NECTARINE 243BC331 DWARF NEW THIS YEAR! White nectarine is self-fruitful, consistently producing super sweet, large size fruit. Harvest late May to early June. 700 or less Hours. Non GMO.

NECTARINE NECTAR BABE MINIATURE NEW THIS YEAR! Excellent quality fruit: mid-season, yellow freestone with sweet, rich, delicious flavor. Heavy bearing 5-6 ft. tree. 400-500 hours. Self-fruitful.

EL DORADO MINIATURE PEACH Very high quality, richly-flavored fruit. Yellow freestone, attractive red-blushed skin. Harvest early to mid -June. 4-5 ft. tree. 500 hours. Self-fruitful.

HONEY BABE MINIATURE PEACH Sweet, yellow freestone with rich flavor. Heaving bearing tree reaching 5 feet. Excellent choice for home orchards. 500 hours. Self-fruitful.

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 www.frontyardnursery.com

NUTS

ALMOND

ALL-IN-ONE GENETIC SEMI-DWARF ALMOND (AVAILABLE POTTED ONLY) No.1 almond for home orchards. Heavy crops of soft-shelled nuts with sweet flavorful kernels. Hot summer required to ripen. 15 ft. tall tree. Very frost hardy. 500 hours. Self-fruitful.

CHESTNUT

COLOSSAL CHESTNUT Thought to be a hybrid of the Asian and European chestnuts. High quality medium to large sized nuts fall easily from the hull, are easy to peel. Large, long-lived, spreading tree. 400-500 hours. Pollinated by Colossal or Nevada seedling.

NEVADA CHESTNUT Pollinizer for the Colossal - also a good producer. One Nevada pollinates 8-10 Colossal trees. Not tolerant of alkaline soil. 500 hours. Pollinated by Colossal.

FILBERT

ETA FILBERT (Hazelnut) One of the newest, disease-resistant introductions from Oregon State University, Eta produces abundant crops of tasty, medium-size nuts. Plant with Jefferson for cross-pollination.

JEFFERSON FILBERT (Hazelnut) Latest release from Oregon State with immunity to Eastern Filbert Blight Disease. Produces a heavy yield of large flavorful nuts that fill their shells well. A late bloomer. Cross-pollinate with Eta.

PECAN

Check with us we may have some in stock

MOHAWK PECAN (AVAILABLE POTTED ONLY) Very large, thin-shelled nut, excellent quality. Earliest maturing, so more widely adapted than others. Attractive tree is vigorous, bears young and heavy. Good choice for home planting. 250 hours. Self-fruitful. . Estimated **Ready Date: August 2018. See note page 11.***

WESTERN SCHLEY PECAN(AVAILABLE POTTED ONLY) Easy to grow, hardy tree. Less fussy about soil & nutrition. Long, tapered, medium-sized thin-shelled nuts. Fine quality, mid-season. 250 hours. Self-fruitful. **Estimated Ready Date: August 2018 – See note on page 11.***

PISTACHIO

KERMAN FEMALE PISTACHIO (AVAILABLE POTTED ONLY) Long hot summers required to ripen. Do not disturb root ball when handling and planting. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollinated by Peters.

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 www.frontyardnursery.com

(7)

PETERS MALE PISTACHIO (AVAILABLE POTTED ONLY)

Pollinizer for Kerman. Does not bear fruit. One Peters pollinates up to eleven females (Kerman). Do not disturb root ball when handling and planting. Drought-resistant once established. 800 hours.

WALNUT

All Walnuts are on No. Calif. Black Walnut

CARMELO WALNUT Late leafing and blooming, adapted to colder climate than Hartley or other popular English walnuts. Very large, well filled nut. 700 hours. Self-fruitful.

CHANDLER WALNUT Developed by UC Davis. Heavy bearing, high quality light-colored nuts. Good choice for backyard tree. Fall harvest. 700 hours. Self-fruitful.

COOKE'S GIANT SWEET WALNUT NEW THIS YEAR!

Excellent walnut for planting in the backyard. It is very productive, with slightly mild flavors, and makes a very large nut. Prolific grower, and generally ripens in the month of September.

FRANQUETTE WALNUT Last English walnut to leaf out, less susceptible to spring frost damage. Very large tree, excellent for shade. Fair production of well-sealed, thin-shelled, high quality nuts. Pollinizer for Hartley. 700 hours. Self-fruitful.

HARTLEY WALNUT Long-time no. 1 walnut in California for its quality and dependability. Large, thin-shelled, well-sealed nut. Light colored flavorful kernel. 700 hours. Self-fruitful.

IDAHO WALNUT Very large, sweet, excellent eating nut, good quality. Extremely hardy variety withstands extreme cold. Vigorous growth. 300-700 hours. Self-fruitful.

NORTHERN CALIFORNIA BLACK WALNUT Medium sized nut tree, a native. Heavy bearing. Great shade tree too. Self-fruitful.

KIWI

ISSAI KIWI (AVAILABLE POTTED ONLY) Fuzzless fruit: no need to peel. Smaller than the standard kiwi, often sweeter. Very high in vitamin C. Much more winter hardy than Hayward. New growth tender to frost, but plant recovers quickly. Often set fruit the first year. Issai is self-pollinating, but not self-fertile. More fruit yield and larger fruit with a male pollinator

KEN'S RED FEMALE KIWI (AVAILABLE POTTED ONLY) Fruits turn red when ripe. Flesh is red, mild and very sweet. Needs male to ensure fruit set. Low-chill variety. One of the largest hardy kiwis. Space 10' to 15' apart on 6' tall trellis.

HARDY MALE KIWI (AVAILABLE POTTED ONLY) Can survive very low temperatures (hardy). Male is needed for female plant to produce fruit. One male can pollinate several female plants. A pretty vine on its own.

GRAPES

WINE

CABERNET SAUVIGNON Late season red wine grape, small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful.

MERLOT GRAPE Black berry, used for distinctive red wines. Best quality in cooler regions. 100 hours. Self-fruitful.

PINOT NOIR GRAPE Small black berries that yield the famous French Burgundy wines. Requires cool summers, cane pruning. Early harvest. 100 hours. Self-fruitful.

SAUVIGNON BLANC Small, oval greenish grapes on a vigorous growing vine. Strong, distinct flavor used for white table wine or blending. Ripens mid-August to early September.

SYRAH GRAPE This reddish black grape produces full, rich wines of intense color and flavor. Ripens mid-season (Sept.). Self-fruitful.

ZINFANDEL GRAPE For fruity red wines. Medium size, round, juicy, reddish-black berry, early mid-season. Prefers mild winters, cool summer. Heavy bearing. 100 hours. Self-fruitful.

TABLE

BLACK MONUKKA SEEDLESS GRAPE Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Fresh or raisins. Early mid-season. 100 hours. Self-fruitful.

CANADICE SEEDLESS GRAPE Red, very sweet, medium-sized fruit. For fresh use or raisins. Ripens in August. . 100 hours. Self-fruitful.

CONCORD SEEDLESS GRAPE American grape, a sport Concord. Berries very similar to Concord, but seedless (or seeds very rare). Bluish-black skin, green flesh, distinctive Concord flavor. 100 hours. Self-fruitful.

FLAME SEEDLESS GRAPE Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens early, before Thompson. Vigorous. 100 hours. Self-fruitful.

GOLDEN MUSCAT GRAPE (AVAILABLE POTTED ONLY) Large, egg-shaped berries are pale golden yellow when ripe. Characteristic European Muscat flavor and aroma. 100 hours. Self-fruitful.

PERLETTE SEEDLESS GRAPE Pale green berry is crisp and juicy. Larger than Thompson and 2 weeks earlier. Requires less summer heat than Thompson to ripen. 100 hours. Self-fruitful.

PRINCESS GRAPE NEW THIS YEAR! (AVAILABLE POTTED ONLY) Seedless grapes are large, green color, juicy seedless fruit with a nice sweet flavor. Fruits hold well, eat fresh and as raisins. 100 Chill Hours. Self-fruitful.

THOMPSON SEEDLESS GRAPE Most popular grape in Calif. & Arizona. Fresh & raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful.

BERRIES

BLUEBERRIES

BLUECROP BLUEBERRY (AVAILABLE POTTED ONLY) No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, flavorful fruit doesn't drop or crack. Tolerates hot summers if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

BLUERAY BLUBERRY (AVAILABLE POTTED ONLY) Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. Blueberry culture requires soil that is moist, acidic, and high in humus. 800 hours. Self-fruitful. Ripens early to mid-season.

CHANDLER BLUEBERRY Extremely large fruit (almost the size of a cherry). Mid to late season harvest, will continue producing over a six week period.

ELLIOT BLUEBERRY (AVAILABLE POTTED ONLY) Heaviest bearing variety, and latest to ripen. Medium size berries, slightly tart, will not crack or drop. Upright, vigorous bush. Tolerate hot summer if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

JUBILEE BLUEBERRY (AVAILABLE POTTED ONLY) Midseason. Jubilee bushes are upright and quite compact, with fruit borne on the outer periphery of the bush. 500-700 hours.

LEGACY BLUEBERRY (AVAILABLE POTTED ONLY) Late mid-season. Vigorous, upright, high yielding variety that is very consistent yearly. Medium-sized fruit with a very superior flavor and sweetness. Self-fruitful, but plant two varieties for biggest crops.

MISTY BLUEBERRY (AVAILABLE POTTED ONLY) Southern Highbush (low chill requirement, tolerates heat). Excellent flavor, early harvest. Does well in inland heat. Blueberry culture requires soil that is moist, acidic, and high in humus.

O'NEAL BLUEBERRY (AVAILABLE POTTED ONLY) Southern Highbush (low chill requirement, tolerates heat). Large fruit is especially sweet and flavorful. Early season. Soil must be high in humus. 5-6 ft. bush. 200 hours. Self-fruitful, but plant 2 varieties for biggest crops.

PATRIOT BLUEBERRY Cold-hardy, early season blueberry with consistent crops. Low-growing, adaptable to many soil types.

PINK LEMONADE BLUEBERRY (AVAILABLE POTTED ONLY) An interesting new variety that bears translucent white berries which mature to bright pink when ripe. Sweet, firm fruit with nice texture.

OUT

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 www.frontyardnursery.com

SOUTH MOON BLUEBERRY (AVAILABLE POTTED ONLY)
Early season. Southern Highbush variety, vigorous grower. Soil must be high in humus. Chilling requirement is 500 hours. Self-fruitful, but plant 2 varieties for biggest crops.

TOP HAT BLUEBERRY (AVAILABLE POTTED ONLY) Similar in shape to a mound-shaped spiraea. Beautiful plant form with fine quality berries. Great ornamental for planters or walkways.

BLACKBERRIES

APACHE Thornless with large perfectly shaped berries. Heavy producer. Likes heat. Ripens late June.

BLACK SATIN (Thornless) Medium to large. Black, Honey sweet flavor. Vigorous grower, excellent for home gardens. New, heavy-yielding semi-erect thornless type, with improved quality and hardiness. Rarely suckers, very disease resistant. Ripens in July.

CHESTER (Thornless) Large fruit with very good flavor. Sweet, high quality, and firm. Will not soften, leak, or lose color in hot weather. Late season producer with a very long production season.

DIRKSEN (Thornless) Large black fruit with excellent quality and flavor, and high sugar content. Resistant to anthracnose. Ripens early July.

LOGANBERRY (Thornless) Medium-large (1 1/4" long, 3/4" thick). Lavender-red berry. Does not darken while ripening. Soft, tart, or sour fruit because of high acidity. Excellent for pies, juice, canning and wine making. Ripens in June.

MARION Medium to large. Fruit is bright red, firm, very flavorful. Produced on vigorous, trailing canes. Suitable for home freezing and canning. Leading variety in Pacific Northwest. Ripens mid-July to mid-August.

OLALLIE Large (1 1/2" long, 3/4" thick) shiny black, firm berry. Sweeter and less tart than others. Vigorous grower, very productive. Hardy to 10 degrees F. Low chill requirement. Commercially planted in California for market. Ripens late May to early July.

BOYSENBERRIES

BOYSENBERRY (Thornless) Medium reddish-black berry. A less vigorous grower with lower fruit yields compared to Regular Boysenberry. Good for mild winter areas. Popular with home owners because its thornless. Ripens in June.

BOYSENBERRY (Regular) Large (1.5" long, 1" thick) non-shiny reddish-black colored berry. Soft, very juicy, sweet-tart berry. Good for canning, freezing, and eating fresh. Ripens in June.

CURRENTS

BEN LOMAND BLACK Heavy producer with the traditional strong pungent flavor. Bush is compact, upright to 5 feet tall. Best production with another variety of black currant for cross pollination. Ripens mid-July.

LAXTON'S GIANT BLACK Very large, high quality, thin skinned, juicy and sweetish fruit ripens early. Vigorous and spreading disease resistant bush is heavy yielding and resistant to frost. Ripens late June.

PINK CHAMPAGNE RED Vigorous upright bush, free of leaf diseases, with a beautiful translucent pink fruit. Pink Champagne is easy to grow, produces fruit of high quality and good flavor. Ripens in July. Self-fruitful

GOJIBERRY

Oblong, bright red berries that are sweet and tart, known for their antioxidant and vitamin C qualities. The plant is trailing and easy to maintain. Likes sun to part sun with regular watering. Self-fruitful.

GOOSEBERRIES

BLACK VELVET The deep purple fruits are the size of seedless grapes. They are very vigorous in growth. Flavor is very good to excellent when they ripen on the bush. Ripens June-July. Self-fruitful

HINNOMAKI RED A unique tart and sweet combination. Tart skin covers the sweet flesh of these tasty, ruby berries, so you can enjoy both flavors. Perfect for making pies and jams. Bushes are heavy producers, even when young. Mildew-resistant and cold-hardy. Ripens in July. Self-fruitful.

HINNOMAKI YELLOW Hardy bushes produce a heavy crop of medium sized, greenish yellow fruit, delicious aromatic flavour with a hint of apricot. The juicy berries are ready to harvest from June to mid- July . Self Fruitful.

RASPBERRIES

BABA RED RASPBERRY (AVAILABLE POTTED ONLY) The well-known ever-bearing "Bababerry." Large red berries up to 1", highly regarded for flavor. Much more tolerant of summer heat than other raspberries. Plentiful June harvest followed by smaller crop in fall.

CANBY RED RASPBERRY Medium to large. Light red berry. Firm, sweet, and excellent for fresh use or freezing. Vigorous canes. Moderate winter hardiness. Likes cooler summers. Nearly thornless. High level of virus & aphid immunity. Ripens in June.

FALL GOLD RASPBERRY This ever-bearing variety is sweet and large with golden yellow color. It is a winter hardy selection that harvests in July through the summer months.

HERITAGE RASPBERRY (AVAILABLE POTTED ONLY) (Red) Large, very firm, excellent quality. Moderate early July crop and heavy production of quality early September fruit. An ever-bearing variety with good vigor, hardy canes which do not need staking. The No. 1 fall variety nationwide.

JEWELL BLACK RASPBERRY (AVAILABLE POTTED ONLY)

Strong producer of flavorful, medium to large berries. Very adaptable. Early season, beginning in late May to early June depending on climate. Upright habit, no support required. Good disease resistance.

LATHAM RASPBERRY NEW THIS YEAR! The firm fruit is easy to pick, red with a sweet flavor. Starts bearing its fall crop 2 to 3 weeks before Heritage.

NOVA RED RASPBERRY NEW THIS YEAR! Medium size dark red fruit. Mild flavor. Firm when ripe. Bears early May, June. Disease resistant, very cold hardy. Few thorns. Self fruitful.

WILLAMETTE RED RASPBERRY (AVAILABLE POTTED ONLY) Tasty, dark red fruit that ripens in mid-summer. Needs well drained soil and mild winters. Popular commercial variety.

STRAWBERRIES

ALBION STRAWBERRY (Everbearing) Known for its very large fruit and conical shape. Pleasant, sweet flavor. Resistant to verticillium wilt and crown rot.

CAMAROSA STRAWBERRY This short day variety produces large, bright, firm and flavorful fruit. Ships and stores well when picked at full color. Early producer.

CHANDLER STRAWBERRY (Everbearing) Very large, medium red, glossy, attractive finish. Fruit conical to long wedge shaped. High yielding. Excellent quality fruit. Excellent coastal variety. Adapted to winter and summer plantings.

TRISTAR STRAWBERRY NEW THIS YEAR! (Everbearing) Firm, sweetly aromatic, large glossy red berries with excellent flavor. Will bear fruit from summer to fall.

SMALL VEGGIES & FRUIT

JERUSALEM ARTICHOKE Perennial. Produces edible tubers which are good in salads, boiled, or in soups. Plants good for landscaping, making a high hedge in one season. Ripens fall.

ASPARAGUS (U.C. 157) Perennial vegetable. Plants take 2-3 years to come into full production, then furnish delicious spears every spring for 10-15 years. Tall, feathery, graceful, highly ornamental plants. U.C. 157 produces earlier, is more uniform in color and size, more productive than other varieties.

JERSEY KNIGHT ASPARAGUS Prolific all-male strain. Spear tips stay tight past the harvest, for weeks of delectable eating. Super tender. Rust resistant. Performs even in heavy clay soil.

HORSERADISH Large, coarse herb cultivated for its roots as a relish. Harvest roots in winter or spring. Mature plant is 3'x 5'.

VICTORIA CHERRY RHUBARB (Seedlings) Vigorous, deep red, heavy thick stalks. Tart flavored, succulent. Great for pies, sauces, and canning. Perennial. Some variation in coloring will be seen from plant to plant.

ORNAMENTAL TREES

AUTUMN BLAZE MAPLE *Acer x freemanii* 'Autumn Blaze' Dense, oval shaped canopy, dense foliage. Fall color is brilliant orange-red. Reaches 50' x 40'. Sunset zones 1-9, 14-24.

OCTOBER GLORY MAPLE *Acer rubrum* 'October Glory' Nearly round canopy, glossy green foliage. Better suited to mild winter and hot summer climates than other maples. Showy red fall color. Ample soil moisture required. Reaches 40'x 35'. Sunset zones 1-9, 14-24.

RED SUNSET MAPLE *Acer rubrum* 'Red Sunset' Upright growth to 40'. Oval shaped canopy, glossy dark green leaves, bright red or orange-red fall color. Ample soil moisture required. Sunset zones 1-9, 14-17.

QUAKING ASPEN *Populus tremuloides* Very distinctive tree - light green round leaves flutter and shimmer in the slightest breeze. Fast growing, 30' tall, 15' wide. Smooth bark, light grayish to white. Bright yellow fall color. Sunset zones 1-7.

KRAUTER VESUVIUS FLOWERING PLUM *Prunus cer. 'Krauter Vesuvius'* Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree 8' high, 12' wide. Favorite purple-leaf plum for California. Foliage of newly planted tree sometimes greenish until vigorous growth begins.

VINES & SHRUBS

HOPS CASCADE *Humulus lupulus* 'Cascade' (AVAILABLE POTTED ONLY) Traditional American aroma hop, used in brewing beer. Well drained soil, full sun. Deciduous vine.

HOPS CENTENNIAL *Humulus lupulus* 'Centennial' (AVAILABLE POTTED ONLY) Classic American aroma hop, used in brewing beer. Similar to Cascade but more intense. Well drained soil, full sun. Deciduous vine.

WISTERIA BLUE *Wisteria sinensis* 'Blue' Lightly fragrant blue flowers. Spring bloom, and again late summer. Fast growth 25-30 ft. long. Sun or part shade. Deciduous vine. Will bloom in considerable shade.

WISTERIA COOKE'S PURPLE *Wisteria sinensis* 'Cooke's Purple' Lightly fragrant purple flowers. Spring bloom, and again late summer. 25-30' long. Full sun, part shade. Deciduous vine.

WISTERIA PINK *Wisteria sinensis x floribunda* 'Rosea Beni Fugi' 12" fragrant pink flowers in spring. 25-30' long. Full sun, part shade. Deciduous vine.

WISTERIA WHITE *Wisteria floribunda* "Longissima Alba" 12" fragrant white flowers in spring. 25-30' long. Full sun, part shade. Deciduous vine.

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 www.frontyardnursery.com

CONIFER TREES

DOUG FIR *Pseudotsuga menziesii* 50 ft. tall, 20-30 ft. wide.
Full sun or light shade. Sunset zones 1-10, 14-17.

OUT

WHITE FIR *Abies concolor* 80-120 ft. tall, 30-50 ft. wide.
Filtered sun or afternoon shade. Sunset zones 1-9, 14-24.

*** POTTED FRUIT TREE NOTES:** Some of our fruit trees must be potted and sold once the tree has fully rooted; for Mulberries and Pecans this is around August. This gives certain fruit and nut tree varieties the best chance of success, cuts down on stress to the tree when transplanted and helps to ensure a healthy and thriving product. You can order your tree now and it will be held for you until it is fully rooted in its pot.

BAREROOT SEASON PRICE BREAKS:

Quantities need to be purchased from the following categories:

No Mix & Match from the categories to receive quantity price breaks.

- *FRUIT TREES
- *NUT TREES
