

**CHILLING HOURS DEFINED:** Chilling refers to the number of hours, 45 degrees F and under, during the dormancy period. All fruit and nut trees need a specific amount of chilling hours before they will produce fruit. The amount varies with each variety and the hours need not be continuous. In the description of the fruit tree, 800 hours (for example) means it needs that many minimum hours of chilling time.

## FRUIT TREES

### APPLE

**ARKANSAS BLACK SPUR APPLE** Large, later season. Dark red skin, high quality even where summer nights are warm. For dessert and cooking. Keeps many months. 800 hours. Partly self-fruitful.

**BRAEBURN APPLE** New from New Zealand. Superb late season fruit. Very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours (est.). Self-fruitful.

**DOLGO CRABAPPLE** Long-time favorite all-purpose crabapple. Large, fragrant white flowers. Fruit makes tasty, bright-red jelly. Vigorous, upright, open tree to 30 feet x 25 feet, depending on conditions. Resistant to scab, rust, mildew, fireblight. 500 hours. Self-fruitful.

**FUJI APPLE** California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull, reddish-orange skin, sometimes russeted. Ripe mid-September. Excellent Pollinizer for other apple varieties. Less than 500 hours. Self-fruitful.

**GALA APPLE** (original Gala) Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish over yellow. Early harvest. Good Pollinizer for other varieties. Adapted to cold and warm winter climates. Less than 500 hours. Self-fruitful.

**GHOST APPLE** Totally white skin, sweet sub-acid flavor. A heat-loving apple, Ghost harvests at the beginning of July in central CA. Chill requirement of 500 hours. Mid-blooming apple required as pollinizer.

**GOLDEN DELICIOUS APPLE** (Yellow Delicious) Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Mid-season harvest, Sept in Central Cal. 700 hours. Self-fruitful.

**GRANNY SMITH APPLE** Large, late, green, crisp, tart, excellent keeper. Requires long summer, thrives in hot climates. 600 hours. Good Pollinizer for other apples. Self-fruitful.

**GRAVENSTEIN APPLE** (Red Gravenstein) Famous for sauce and baking, also used fresh. Crisp, juicy flavor, tart green with red stripes. Early bloom, early harvest. 700 hours. Pollen sterile. Pollinizer required – Empire, Fuji, Gala, Red Delicious.

**HONEYCRISP APPLE** Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy, with aromatic flavor. Striped red over yellow color. Stores well. Ripens in late September to late October. Pollinated by Fuji, Gala, or Golden Delicious.

**JONAGOLD APPLE** Superb flavor – connoisseur's choice. A cross of Jonathan and Golden Delicious. Yellow with red-orange blush. Crisp, juicy, sub-acid, all purpose. 700-800 hours. Pollinated by Fuji, Gala, Granny Smith, or Red Delicious.

**LIBERTY APPLE** Disease-resistant, & cold hardy. Resists scab, rust, mildew, fireblight. Solid red. Crisp, rich sprightly flavor. Fresh or cooked. Early fall harvest. 800 hours. Self-fruitful

**MUTSU (CRISPIN) APPLE** A favorite of connoisseurs: very large, crisp, and flavorful. Late September/October harvest. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 600 hours. Pollen sterile - pollinated by Red Delicious, Granny Smith, Fuji, Gala.

**PINK LADY APPLE** (Cripps Pink) New hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late Oct in Central Cal. Self-fruitful. 4-500 hours.

**PINK PEARL APPLE** Unusual pink-fleshed, highly aromatic fruit. Medium size, cream and pale green skin, sometimes blushed red. Tart to sweet-tart, depending on time of picking. Early fall harvest. Good keeper. Makes colorful, tasty applesauce. 600 hours. Pollinizer required.

**RED DELICIOUS APPLE** (Bisbee spur) Sweet, crisp, flavorful - perhaps the best Red Delicious. Early fall harvest. Small, compact tree. Good Pollinizer for most other apples. 700 hours. Pollinated by Liberty, Granny Smith, Golden Delicious, Fuji, Gala.

**RED FUJI APPLE** (BC#2) Redder-skinned sport of Fuji. Sweet, very crisp, and flavorful; excellent keeper. Ripe Sept-Oct in Central Cal. Excellent Pollinizer for other apples. Self-fruitful.

**ROME BEAUTY APPLE** Late blooming, a good choice where hard freezes in late spring are common. Large, round, red, used primarily for cooking. Heavy bearing. Late harvest. 1000 hours. Self-fruitful.

**SIERRA BEAUTY APPLE** Favorite late apple in No. Calif. Yellow with red blush, rich sprightly flavor, moderately sweet. Excellent fresh or cooked. 700-800 hours. Self-fruitful.

**TYDEMAN'S LATE ORANGE** This apple has consistently better quality and flavor in hot summer climates. Good keeper with reddish-orange stripes over greenish-yellow color. Yellow flesh is firm and juicy. 800-1000 hours. Pollinizer required.

**WINESAP APPLE** (Stayman Double Red Winesap) Long-time favorite late red apple. Juicy, smooth texture. Lively flavor, used fresh or cooked. 800 hours. Pollen sterile. Pollinated by Red or Golden Delicious, Fuji, Gala, Liberty.

**YELLOW NEWTON PIPPIN APPLE** Yellow-green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest till cheeks are blushed yellowish green (late Oct./early Nov. in Central Cal). Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. 700 hours. Self-fruitful.

**SPECIAL ORDER APPLES**

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they **must be pre-ordered with us by November 1, 2017**. Other sizes and root stocks (including dwarf) are also available. Please ask a sales associate for more information. No Discounts on SO.

**AKANE APPLE (SPECIAL ORDER)** Especially nice red dessert apple derived from Jonathan - sweet, rich, spicy flavor. Resists scab and powdery mildew. Harvest in early season (Aug in Central Cal). 800 hours. Pollinizer required. *Must order by 11/1/17.*

**ANNA APPLE (SPECIAL ORDER)** Remarkable fruit for mild-winter climates. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. 200 hours. Self-fruitful or pollinated by Dorsett Golden or Einshemer. *Must order by 11/1/17.*

**ASHMEAD'S KERNEL (SPECIAL ORDER)** Many think of this apple as one of the all-time best flavored. Small to medium fruit, used for dessert, cider, and sauce. Good keeper. 800 hours. Best with pollinizer. *Must order by 11/1/17.*

**BELLE DE BOSKOOP APPLE (SPECIAL ORDER)** Delicious cooking, pie and dessert apple. Heavy crops of large to very large fruits. Green and red skin in patches, with a brown russet extending from base. Coarse, crisp, juicy white flesh is sweet-tart to sub-acid. Keeps well, very late harvest. 800-1000 hours. Sterile pollen, Pollinizer required. *Must order by 11/1/17.*

**BEVERLY HILLS APPLE (SPECIAL ORDER)** Long-time favorite summer apple for coastal California. Pale yellow, red blush or stripes. Medium size, slightly tart. Fresh/cooked. 300 hours. Self-fruitful. *Must order by 11/1/17.*

**BRAMLEY'S SEEDLING APPLE (SPECIAL ORDER)** England's favorite cooking apple. Large with very tart, creamy yellow flesh, great for pies and sauce. Fully ripened fruit is firm, juicy, less tart and suited to fresh use. Heavy bearing and disease-resistant. 800-1000 hours. Sterile pollen, Pollinizer required. *Must order by 11/1/17.*

**CALVILLE BLANC APPLE (SPECIAL ORDER)** Classic French dessert apple, also excellent for cooking and cider. Flattened, round shape with prominent, uneven ribs near the base. Vigorous grower with weeping side limbs. Pick green, then turns yellow, with best flavor 1 month after picking. 800-1000 hours. Pollinizer required. *Must order by 11/1/17.*

**CHEHALIS APPLE (SPECIAL ORDER)** Highly scab-resistant variety discovered near Chehalis, WA in 1937. Large fruit, resembling Golden Delicious. Cream colored flesh is crisper than Golden Delicious, the shape more elongated. Sweet, subacid, mild flavor. Used fresh and for baking. *Must order by 11/1/17.*

**CORTLAND APPLE (SPECIAL ORDER)** Large red apple. Long-time favorite in eastern US for fresh eating, cooking & cider. Sweet-tart, flavorful, non-browning white flesh. Precocious, productive tree, hardy to -40°. 800 to 1000 hours. Self-fruitful. *Must order by 11/1/17.*

**COX ORANGE PIPPIN APPLE (SPECIAL ORDER)** Old favorite dessert apple. Firm, juicy, sweet, rich flavor, not tart. Distinctive aroma. Skin is orange-red to bright red over yellow. Prefers moderate climate. Mid-season. 800 hours. Self-fruitful. *Must order by 11/1/17.*

**DORSETT GOLDEN APPLE (SPECIAL ORDER)** Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Good early season sweet apple for Central Cal. 100 hours. Self-fruitful. *Must order by 11/1/17.*

**EINSEMER APPLE (SPECIAL ORDER)** Heavy-bearing, very low chilling requirement. Sweet yellow apples in early summer (late June in Central Cal). Excellent Pollinizer for Anna. 100 hours. Self-fruitful. *Must order by 11/1/17.*

**ELSTAR APPLE (SPECIAL ORDER)** Fine quality, all-purpose apple similar to Jonagold, but a better keeper. Medium to large size, round to conical shape, with yellow skin mostly striped with light red or reddish-orange. Firm, crisp, creamy white flesh with outstanding flavor. Best quality in cool summer climates. Fruit may be tree-ripened or ripened in storage. *Must order by 11/1/17.*

**EMPIRE APPLE (SPECIAL ORDER)** Sweet and juicy, sprightly flavor, a cross of McIntosh and Red Delicious. McIntosh-type apple for hot summer climates. Heavy bearing tree. Early fall harvest. 800 hours. Self-fruitful. *Must order by 11/1/17.*

**GOLDEN RUSSET APPLE (SPECIAL ORDER)** Crisp, aromatic, creamy yellow flesh with great flavor and sugary juice. Medium sized. Used fresh and for cider, drying and cooking. Winter hardy, vigorous tree with good disease resistance. 800 hours. Partly self-fruitful. *Must order by 11/1/17.*

**GORDON APPLE (SPECIAL ORDER)** Popular variety for So. Cal. Low chilling requirement, about 400 hours. Red over green skin, good quality. For fresh use and cooking. Self-fruitful. *Must order by 11/1/17.*

**HARALSON APPLE (SPECIAL ORDER)** Extremely winter hardy tree. Med-sized fruit is red-striped to solid red. Firm, crisp, juicy with a mild, slightly tart flavor. Used fresh, for cider and baking. Early harvest. Excellent keeper: retains its quality for 4-6 months. Vigorous, heavy-bearing tree. 1,000 hours. Self-fruitful. *Must order by 11/1/17.*

**HUDSON'S GOLDEN GEM APPLE (SPECIAL ORDER)** One of the largest and best-flavored russet apples. Crisp, sugary, juicy flesh. Flavor described as nutty by some, pear-like by others. Good keeper. Medium sized tree, resistant to scab, mildew and fireblight. Ripens mid-Sept. 800-1000 hours. Partly self-fruitful, best crops with pollinizer. *Must order by 11/1/17.*

**JONATHON APPLE (SPECIAL ORDER)** Heavy annual bearer, high quality when well grown. Cooks well. Medium to dark red. Crisp, juicy, moderately tart, flavorful. August harvest in Central Calif. 700 to 800 hours. Self-fruitful. *Must order by 11/1/17.*

**KING APPLE (Tompkins King) (SPECIAL ORDER)** Large, old-time red-striped apple with classic flavor. Used for dessert, cooking, and cider. Ripens mid-season. Horizontal limbs, spreading growth habit. 800-1000 hours. Sterile pollen; Pollinizer required. *Must order by 11/1/17.*

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 [www.frontyardnursery.com](http://www.frontyardnursery.com)

**MCINTOSH APPLE (SPECIAL ORDER)** Round, bright to dark red over green, superb quality in cool climates. Crisp, aromatic, sweet, subacid. Dessert/cooking. Early harvest. 900 hours. Partly self-fruitful, or pollinated by Red Delicious, Gala, or other. *Must order by 11/1/17.*

**MELROSE APPLE (SPECIAL ORDER)** A favorite home orchard variety in Oregon's Willamette Valley. Very juicy, slightly tart, high quality fruit for dessert and cooking. Keeps 2-3 months. Medium to very large size, shape varying from flattened to conic. Mid to late-season bloomer, good pollinator for other apples. 800-1000 hours. Partly self-fruitful, biggest crops with cross-pollination. *Must order by 11/1/17.*

**MOLLIE'S DELICIOUS APPLE (SPECIAL ORDER)** A favorite Red Delicious-type apple for mild winter climates. Sweet, flavorful, aromatic. Red blush over yellow. 4-500 hours. Pollinizer required. *Must order by 11/1/17.*

**NORTHERN SPY APPLE (SPECIAL ORDER)** Large, fruit is firm and aromatic with a lively, tart flavor. Greenish-yellow skin with red blush or stripes. Dessert/cooking, excellent keeper. Winter hardy, vigorous tree. Slow to begin bearing. 1000 hours. Pollinated by Golden Del. *Must order by 11/1/17.*

**PETTINGILL APPLE (SPECIAL ORDER)** Low winter chilling requirement, about 100 hours. Large fruit, red over green skin, ripening late Sept to mid-Oct in coastal So. Cal climates. Crisp and juicy, with a balance of sugar and acid. Good keeper. Large, vigorous, productive tree. Self-fruitful. *Must order by 11/1/17.*

**RED DELICIOUS (HARROLD) APPLE (SPECIAL ORDER)** Early fall fruit is sweet, crisp, fine-flavored. Vigorous, productive tree. Good pollinizer for almost all other apples. 700 hours. Pollinated by Fuji, Gala, Granny Smith, or Golden Delicious. *Must order by 11/1/17.*

**SNOW (FAMEUSE) APPLE (SPECIAL ORDER)** Famous for its pure white flesh and spicy, aromatic, subacid flavor. Small to med-sized fruit w/ light red stripes. Used primarily for dessert, also for cooking and cider. Oct harvest, keeps till the holidays. Very hardy, long-lived, heavy-bearing tree. 600 hours. Partly self-fruitful. *Must order by 11/1/17.*

**SPARTAN APPLE(SPECIAL ORDER)** McIntosh-type dessert apple, but firmer. Pure white flesh is crisp, juicy, highly aromatic, fine-flavored. Med size, with dark red skin. Early harvest. Keeps several months. Resistant to scab, mildew and fireblight. Winter hardy, precocious, heavy-bearing tree. 800-1000 hours. Self-fruitful; bigger crops if cross-pollinated by Lodi, Wealthy, or Liberty. *Must order by 11/1/17.*

**SPITZENBURG (ESOPUS) APPLE(SPECIAL ORDER)** Old variety, regarded by some connoisseurs as the very best dessert apple. Red over yellow skin, yellowish flesh. Firm, juicy, moderately sweet, renowned flavor. Good keeper. 800 hours. Pollinizer required. *Must order by 11/1/17.*

**SUNDOWNER APPLE (SPECIAL ORDER)** Fruit is sweet and crispy with white flesh and excellent flavor. A sister to the popular Pink Lady. Late harvest with low chill: 200-300 hours. Self-fruitful. *Must order by 11/1/17.*

**TRANSCENDENT CRABAPPLE (SPECIAL ORDER)** Yellow skin with pink or red blush to almost entirely red. Up to 2 inches wide. Creamy yellow flesh is crisp, juicy and flavorful. Late summer harvest. Medium-sized tree, consistent crops. 7-800 hours. Self-fruitful. *Must order by 11/1/17.*

**WALTANA APPLE (SPECIAL ORDER)** Known by old timers around Ettersberg, CA as The Etter Apple. This apple is sometimes green on younger trees but is normally red with a yellow/green background. It is known for its versatility (cider, canning, dessert and fresh eating) and its excellent storage properties. *Must order by 11/1/17.*

**WEALTHY APPLE (SPECIAL ORDER)** Very winter hardy with high quality fruit for dessert and culinary use. Med- large size, skin yellow to red or solid red when fully tree-ripe. White flesh is crisp, very juicy, with a distinct fruity flavor. Early harvest. Keeps 2-3 months. Small, compact tree begins bearing at young age. Best on fertile soil. Good pollinator for other varieties. 1000 hours. Self-fruitful. *Must order by 11/1/17.*

**WHITE WINTER PEARMAIN APPLE (SPECIAL ORDER)** High quality, all-purpose apple - an old favorite. Widely adapted, including mild-winter coastal climates. Cream-colored flesh is fine-grained, crisp, juicy and aromatic with a rich, subacid to sprightly flavor. Good keeper. Healthy, vigorous, spreading, heavy-bearing tree. Excellent pollinator for other apples. 400 hours. Self-fruitful. *Must order by 11/1/17.*

**WINTER BANANA APPLE (SPECIAL ORDER)** Large, round, pale yellow waxy skin blushed with rosy pink. Crisp, tangy, juicy flesh is aromatic with a mild, banana-like flavor. Long-time favorite dessert apple and good cider apple. Harvest mid to late-Sept in Central Cal. Good keeper. Vigorous. Excellent pollinator for other apples. 400 hours. Partly self-fruitful, biggest crops if cross-pollinated. *Must order by 11/1/17.*

**WOLF RIVER APPLE (SPECIAL ORDER)** Famous for its frequently huge size, used primarily for cooking, also good fresh and dried. Firm, juicy flesh is slightly aromatic, with a distinctive, mild, subacid flavor. Early harvest. Very winter hardy, disease-resistant, long-lived. 1,000 hours. Partly self-fruitful, or cross-pollinate with another late-blooming variety such as Northern Spy, Melrose, or Golden Delicious. *Must order by 11/1/17.*

**YELLOW BELLFLOWER APPLE (SPECIAL ORDER)** Long-time favorite pie and sauce apple, also excellent fresh and for making hard cider. For winter dessert use, the fruit may be picked while still tart; it mellows in storage, reaching peak flavor and acid-sugar balance after a few months. Fruits vary in size. Mid-Sept harvest in Central Cal. 400 hours. Mid-season bloom. Pollinizer required. *Must order by 11/1/17.*

**YELLOW TRANSPARENT APPLE (SPECIAL ORDER)** Long-time favorite cooking apple for the early summer (June to early July in most climates). Crisp, juicy and flavorful: excellent for sauce and pies, and fresh or dried. In hot summer climates, begin picking while fruit is still green and tart. Season lasts 3-4 weeks. Winter hardy, vigorous, begins bearing very young. 800-1000 hours. *Must order by 11/1/17.*

**YORK APPLE (York Imperial) (SPECIAL ORDER)** One of the best apples for keeping: holds its flavor till April or May. Fine quality for dessert use, excellent for baking and cider. Late harvest. Fairly large tree is moderately winter hardy, late-blooming, disease resistant. At its best on heavier clay soils. 800-1000 hours. Self-fruitful. *Must order by 11/1/17.*

## APRICOT

**BLENHEIM (ROYAL) APRICOT** All-purpose freestone, sweet, aromatic, flavorful. Long time #1 apricot in California. Early bloom. Late June harvest in Central Calif. 500 hours. Self-fruitful.

**CANADIAN WHITE BLENHEIM APRICOT** Syrupy sweet white flesh with firm texture. Taste test winner. 500-700 hours. Partly self-fruitful. Biggest crop if cross-pollinated.

**HARCOT APRICOT** From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid-June in Central Cal. Sweet, juicy, rich flavor - one of the best. 700 hours. Self-fruitful.

**HARGLOW APRICOT** Late-blooming, productive tree, proven producer in coastal Northwestern climates. Medium size, bright orange fruit sometimes blushed red. Orange freestone flesh is firm, sweet, flavorful. Resistant to perennial canker and brown rot, resists cracking. 800 hours. Self-fruitful.

**PUGET GOLD APRICOT** Proven producer of large, flavorful fruit in Western Wash. Recommended for climates where spring rains and frosts limit apricot culture. August harvest. 600 hours. Self-fruitful.

### SPECIAL ORDER APRICOTS

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they *must be pre-ordered with us by November 1, 2017.* Other sizes and root stocks are also available. Please ask a sales associate for more information. No Discounts on SO.

**AUTUMN GLO APRICOT (SPECIAL ORDER)** Late season apricot with tremendous flavor. Ripens in the first two weeks of August. Fruit is medium sized with good color. *Must order by 11/1/17.*

**BRITTANY GOLD APRICOT (SPECIAL ORDER)** Sweet consistent producer. Tough apricot where others fail. Large firm fruit hangs on tree for two weeks or more at end of July. Self Fruitful. *Must order by 11/1/17.*

**CHINESE (Mormon) APRICOT (SPECIAL ORDER)** Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult, spring frost-prone climates. 700 hours. Self-fruitful. *Must order by 11/1/17.*

**EARLI AUTUMN APRICOT (SPECIAL ORDER)** Wonderful flavor both fresh and dried. It will please even the most critical of apricot lovers. Late harvest, first two weeks of August. *Must order by 11/1/17.*

**FLAVOR GIANT APRICOT (SPECIAL ORDER)** One of the earliest fruits of the year (late May/early June in Central Cal). Heavy crops of extremely large, sweet/tart, flavorful fruit. 600 hours. Self-fruitful. *Must order by 11/1/17.*

**FLORA GOLD APRICOT (SPECIAL ORDER)** All-purpose freestone. Early harvest. Very good quality, reliable producer (produces when other varieties don't). Good choice for backyard apricot. 500 hours. Self-fruitful. *Must order by 11/1/17.*

**GOLDCOT APRICOT (SPECIAL ORDER)** Productive in cold, humid climates. Medium fruit, freestone flesh. Juicy tangy, used for freezing and canning. 800 hours. Self-fruitful. *Must order by 11/1/17.*

**GOLDKIST APRICOT (SPECIAL ORDER)** Excellent backyard apricot for warm winter climates. Freestone, very good quality. Heavy bearing. Early harvest. 300 hours. Self-fruitful. *Must order by 11/1/17.*

**HUNZA APRICOT (SPECIAL ORDER)** Native to northwest Pakistan, the fruit is sweet and flavorful. Very cold hardy. *Must order by 11/1/17.*

**KATY APRICOT (SPECIAL ORDER)** Large, all-purpose flavorful freestone. Fruit is subacid (not tart). A favorite apricot for warm-winter climates. Early harvest, 400 hours. Self-fruitful. *Must order by 11/1/17.*

**MOORPARK APRICOT (SPECIAL ORDER)** Long-time favorite of apricot fanciers for its exceptionally rich flavor and aroma. Reliable producer. Used fresh and for canning. 600 hours. Self-fruitful. *Must order by 11/1/17.*

**NUGGET APRICOT (SPECIAL ORDER)** Large, flavorful yellow freestone. Attractive orange skin blushed with red. Ripens mid-June in Central Calif. Vigorous, productive tree. 500 to 600 hours. Self-fruitful. *Must order by 11/1/17.*

**PERFECTION APRICOT (SPECIAL ORDER)** Very productive, hardy tree. Fruit is very large, sweet and juicy. Performs well where spring frost is a problem. *Must order by 11/1/17.*

**RIVAL APRICOT (SPECIAL ORDER)** Aromatic, slightly tart, large oval fruit. Heavy midseason bloomer, good producer. Early harvest of orange-red blushed or speckled red fruit with deep orange flesh. Reliable variety where frost hardy traits are required. Requires an early blooming pollinizer. *Must order by 11/1/17.*

**ROYAL ROSA APRICOT (SPECIAL ORDER)** Extremely vigorous-more disease tolerant than other apricots. Bears young and heavy. Especially nice fruit: sweet, low acid, fine flavor. Very early harvest (late May in Central Cal). Excellent backyard apricot. 500 hours. Self-fruitful. *Must order by 11/1/17.*

**TILTON APRICOT (SPECIAL ORDER)** No. 1 apricot for canning, excellent fresh or dried. Medium to large, firm, rich flavor. Widely adapted. 600 hours. Self-fruitful. *Must order by 11/1/17.*

**TOMCOT APRICOT (SPECIAL ORDER)** Consistently productive apricot. The most dependable producer in marginal climates, by far. Large, orange fruit with firm, sweet flesh. Early harvest. 600 hours. Partly self-fruitful, best with another apricot like Harcot or Harglow. *Must order by 11/1/17.*

**WENATCHEE MOORPARK APRICOT (SPECIAL ORDER)** Recommended for western climates where spring rains and frosts limit apricot culture. Flavorful fruit used fresh, dried, canned. 700 hours. Self-fruitful. *Must order by 11/1/17.*

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 [www.frontyardnursery.com](http://www.frontyardnursery.com)

**CHERRY**

**BING CHERRY** Large, firm, juicy, sweet, nearly black when ripe - superb flavor, #1 cherry. Mid-season. Large, vigorous tree. 700 hours. Pollinized by Black Tartarian, Van, Rainier. Also Stella in colder climates.

**BLACK TARTARIAN CHERRY** Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollinizer required - interfruitful with all popular sweet cherries.

**CRAIG'S CRIMSON CHERRY** Taste test winner. Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard. Mid-season. 800 hours.

**LAPINS CHERRY** Self-fruitful dark red sweet cherry. Large, firm, good flavor. Similar to Van in color, Bing in shape. Great pollinator for Bing. Sometimes sold as "Self-fruitful Bing." 800 hours.

**RAINIER SWEET CHERRY** Large, yellow with red blush. Sweet and flavorful - superior to Royal Ann. Very cold hardy. Mid-season harvest. 700 hours. Pollinizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

**ROYAL CRIMSON CHERRY** Low chill cherry. Bright red, sweet, superb flavor. Self fruitful. Sold last year as 6GM25.

**ROYAL RAINIER CHERRY** Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Ripens early. Moderate chill requirement, 600-700 hours. Pollinizer required. Interfruitful with Van, Lambert, Black Tartarian, Bing.

**UTAH GIANT CHERRY** Best sweet cherry, according to Utah folks. Larger, firmer, more flavorful than Bing or Lambert. Good canner. Does not double. 800 hours. Pollinizer required. Bing, Lambert, Rainier, Van.

**VAN CHERRY** Dark flesh, semi-sweet flavor. This cherry is heavy bearing, cold hardy, and resists cracking. Large fruit, very reliable. 900 hours. Pollinizer required: Bing, Black Tartarian, or Stella. Excellent Pollinizer for other sweet cherries.

**SPECIAL ORDER CHERRIES**

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they **must be pre-ordered with us by November 1, 2017**. Other sizes and root stocks (including dwarf) are also available. Please ask a sales associate for more information. No Discounts on SO.

**EARLY RICHMOND CHERRY (SPECIAL ORDER)** Sour Cherry. Heavy-producing, widely adapted tree: vigorous and healthy in many climates and soils. Early-ripening, flavorful, juicy, bright red fruit used primarily for cooking and canning. 700 hours. Self-fruitful. *Must order by 11/1/17.*

**ENGLISH MORELLO SOUR CHERRY(SPECIAL ORDER)** Late-ripening tart cherry used for cooking, sometimes eaten fresh when fully ripe. Dark red to nearly black fruit with dark

juice. Small, round-headed tree. 700 hours. Self-fruitful. *Must order by 11/1/17.*

**LAMBERT CHERRY (SPECIAL ORDER)** Large, black, late harvest. Highest quality, rivaling Bing. Less susceptible to cracking due to later season. 800 hours. Pollinized by Van, Rainier, or Black Tartarian. *Must order by 11/1/17.*

**METEOR SEMI-DWARF CHERRY (SPECIAL ORDER)** Sour Cherry. Large, bright red fruit, used mostly for cooking. Tart, juicy, meaty flesh; colorless juice. Attractive, naturally small tree (10-12 ft.) Hardy to -50°F when fully dormant. 800 hours. Self-fruitful. *Must order by 11/1/17.*

**MINNIE ROYAL CHERRY (SPECIAL ORDER)** Medium-sized red cherry; firm with good flavor. Ripens 11-14 days ahead of Bing. Tree is very productive with a low chill requirement: 400 to 500 hours. Pollinized by Royal Lee. *Must order by 11/1/17.*

**MONTMORENCY SOUR CHERRY (SPECIAL ORDER)** Large, light red skin with yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy and very heavy bearing. 700 hours. Self-fruitful. *Must order by 11/1/17.*

**ROYAL ANN CHERRY (SPECIAL ORDER)** Long-time favorite yellow sweet cherry for eating fresh or canning. Pollinizer required. Interfruitful with Van and Black Tart, not Bing. 700 hours. *Must order by 11/1/17.*

**ROYAL LEE CHERRY (SPECIAL ORDER)** Medium-large red cherry; heart shaped, very firm with excellent flavor; ripens 11-14 days ahead of Bing. Very productive. Pollinized by Minnie Royal. 400-500 hours. *Must order by 11/1/17.*

**STELLA CHERRY (SPECIAL ORDER)** Self-fruitful - no Pollinizer needed. Large, nearly black, richly flavored sweet cherry. Late harvest. Pollinizes Bing. 700 hours. *Must order by 11/1/17.*

**SUNBURST CHERRY (SPECIAL ORDER)** Large, dark-skinned sweet cherry similar to Stella. Resists cracking. Ripens midseason., 800 hours. Self-fruitful. *Must order by 11/1/17.*

**SWEETHEART CHERRY (SPECIAL ORDER)** Large, bright red fruit with good flavor. Precocious tree requires pruning to prevent size problems. Self-fruitful. *Must order by 11/1/17.*

**FIG**

**BLACK JACK FIG (AVAILABLE POTTED ONLY)** Large, purplish-brown figs with sweet, juicy, strawberry-red flesh. Harvest Aug to Oct in Central Cal. Naturally small tree (semi-dwarf). 100 hours. Self-fruitful.

## OLIVE

**ARBEQUINA OLIVE** *AVAILABLE POTTED ONLY* Excellent clonal selection of Arbequina showing higher olive production and oil yields. Oil is sweet, delicate and fragrant with intense fruitiness but low levels of bitterness and spiciness. Self-fertile

**ARBOSANA OLIVE** *AVAILABLE POTTED ONLY* The dwarf Arbosana tree produces large crops of small olives with high concentrations of premium olive oil. The Arbosana flavor is a complex mixture of fruitiness with a good balance of pungency and bitterness. The late-bearing Arbosana variety is fairly cold hardy though not as hardy as Arbequina. self-fertile, but produces higher yields when paired with a pollinizer such as Arbequina.

**MANZANILLO OLIVE** *AVAILABLE POTTED ONLY* Classic table olive. Large variety that can be eaten both green and ripe black. This variety becomes fruitier and less bitter as it ripens. Moderately cold hardy. Self-fruitful but produces higher yields with a pollinizer.

**MISSION OLIVE** *AVAILABLE POTTED ONLY* The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollinizer.

## PEACH

**ARCTIC SUPREME WHITE PEACH** Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central Cal. 700 hours. Self-fruitful.

**AUTUMN FLAME PEACH** *NEW THIS YEAR!* Large size, round, fair to good flavor, very little blush over yellow skin, good firmness, heavy producer. Ripens late September.

**DIAMOND PRINCESS PEACH** *NEW THIS YEAR!* Medium size, vigorous, hardy, very productive and regular bearing tree. The freestone fruit is uniformly large size, of globose shape, with very firm texture and a delicious flavor balance of acid and sugar. Ripens early July.

**DOUBLE JEWEL PEACH** Flowering/fruitlet peach for home orchard and landscape. Profuse, showy, double pink flowers. Late blooming, but early harvest – late June in Central Cal. Large, richly flavored, yellow freestone. Self-fruitful.

**ELBERTA PEACH** Famous yellow freestone. Classic, rich, peach flavor: high scoring in taste tests. Use fresh, canned, cooked. Ripe late July/early Aug in Central Cal, up to 3-4 weeks later in colder climates. 800 hours. Self-fruitful.

**FAIRTIME PEACH** An old favorite, yellow peach with nice red blush. Firm texture and very tasty. Ripens in early Sept. 500-600 hours. Self-fruitful.

**FROST PEACH** Resistant to peach leaf curl (10-year trials at Washington State U.). Delicious yellow freestone. Slight red blush over greenish yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July harvest. Showy pink bloom in spring. 700 hours. Self-fruitful.

**GIANT BABCOCK WHITE PEACH** From a cross of Babcock and July (Kim) Elberta. Large, red-skinned, white-fleshed freestone. Sweet, aromatic, very similar to Babcock. Excellent dessert quality. 500 hours. Self-fruitful.

**INDIAN BLOOD CLING PEACH** Large, late-season canning peach. Red-skinned, red flesh, rich flavor. Blooms late, sets heavy crops. 800 hours. Self-fruitful.

**INDIAN FREE PEACH** Taste test winner at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinate.

**JULIET'S PRIZE PEACH** *NEW THIS YEAR!* Large and sweet, with bright white flesh and big red/pink skin, Self-fruitful.

**JULY (KIM) ELBERTA PEACH** Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 500 hours. Self-fruitful.

**KAWEAH PEACH** High yield, large fruit, delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. 500 hours. Mid-late season. Self-fruitful.

**O'HENRY PEACH** Popular fresh market yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-Aug in Central Cal. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

**REDHAVEN PEACH** World's most widely planted peach. High quality yellow freestone. Ripens early July in Central Cal. Frost hardy. Fresh/freeze. 800 hours. Self-fruitful.

**RIO OSO GEM PEACH** Favorite late yellow freestone. Large, sweet, rich flavor, like J.H. Hale. Fresh/freeze. Small tree. Showy bloom. Mid-August in Central Cal. 800 hours. Self-fruitful.

**SNOW BEAUTY WHITE PEACH** *NEW THIS YEAR!* Low acid, high sugar, tantalizing flavor. Large, very firm, red skin. Taste test winner. Mid-July harvest in Central Cal. 750-850 hours. Self-fruitful.

**SUMMER LADY PEACH** *NEW THIS YEAR!* Large size, shape similar to O'Henry, good flavor, bright red skin, very good firmness, good producer, a very promising variety. Ripens Late July. Self-fruitful.

**SPECIAL ORDER PEACHES**

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they **must be pre-ordered with us by November 1, 2017**. Other sizes and root stocks (including dwarf) are also available. Please ask a sales associate for more information. No Discounts on SO.

Clingstone. *Must order by 11/1/17.*

## PLVOTS - See HYBRIDS (next page)

## POMEGRANATE

**AC SWEET POTTED ONLY** Flavor is sweet and refreshing, seeds are soft and edible. Ripe fruit can hang for weeks without splitting. Very hardy plant will take temperatures to below zero. One of Utah's favored varieties. Required chill hours 100-200. Self-fruitful.

**ARIANA POMEGRANATE NEW THIS YEAR! POTTED ONLY** Sweet-tart with great flavor. Medium to large fruit has red skin, dark red arils and very soft seeds. Ripens late September to mid October. 100-200 hours. Self-fruitful.

**AMBROSIA POMEGRANATE POTTED ONLY** Fantastically huge fruit: up to 3 times the size of Wonderful. Pale pink skin, purple sweet-tart juice, similar to Wonderful. Long-lived, any soil, inland or coastal climate. 150 hours. Self-fruitful.

**EVE POMEGRANATE POTTED ONLY** Heavy producing red fruiting variety with pink seeds(arils) and excellent taste. Self fertile.

**EVERSWEET POMEGRANATE POTTED ONLY** Very sweet, virtually seedless fruit. Red skin, clear juice. Harvest late summer through fall. Large, showy, orange-red flowers. 150 hours. Self-fruitful.

**PINK SATIN POMEGRANATE NEW THIS YEAR! POTTED ONLY** Sweet, fruit-punch flavor, pink to dark red fruit. Medium to large sized fruit with light-pink edible seeds. Its light-colored juice is non-staining. 150 hours. Self-fruitful.

**PARFIANKA POMEGRANATE POTTED ONLY** Large, beautiful bright red fruit with very small edible seeds. Very high quality fruit. 100-200 hours. Self-fruitful.

**RED SILK POMEGRANATE POTTED ONLY** Medium to large fruit with edible seeds that have sweet berry flavor. Semi-dwarf tree sets large crops. Eat fresh or use in cooking. 150-200 hours. Self-fruitful.

**WONDERFUL POMEGRANATE POTTED ONLY** Large, purple-red fruit with a delicious, tangy flavor. Best quality in hot inland climate. Bright red-orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

## QUINCE

**PINEAPPLE QUINCE** Heavy crops of large, tart fruit used in baking, jams, and jellies. Profuse, ornamental bloom. 300 hours. Self-fruitful.

## MULTI-BUDDED FRUIT TREES

Multi-budded fruit trees are those with multiple varieties grafted onto a single tree. They work well in small spaces or if you want many varieties of a specific fruit without the maintenance of multiple trees. All multi-budded trees have varieties that will pollinate each other. We offer the following trees:

**APPLE 3-N-1**

**APPLE 6-N-1 ESPALIER**

**ASIAN PEAR 3-N-1**

**CHERRY 3-N-1**

**PEAR 3-N-1 DISEASE RESISTANT**

**PLUOT 4-N-1**

**PLUOT 4-N-1 Zee Sweet Nugget**

**FRUIT SALAD 4-N-1 (Peach, Nectarine, Plum, Apricot)**

**NECTARINE-PEACH MULTI-BUDDED (SPECIAL ORDER)**

Necta Zee and Honey Babe, or Nectar Babe and Pix Zee. Miniature Trees. See descriptions under special order Mins (below). *Must order by 10/31/17.*

**CHERRY-PLUM 2-N-1 SPRITE/DELIGHT (SPECIAL ORDER)**

See fruit descriptions below. *Must order by 10/31/17.*

## HYBRID FRUITS

**APRIUM® COT-N-CANDY** Apricot-plum hybrid. Resembles an apricot, but with a distinctive flavor and texture all its own. White flesh is extra sweet and juicy with a plum aftertaste. Ripens one week later than Flavor Delight. Self-fruitful.

**APRIUM® FLAVOR DELIGHT** Apricot-plum hybrid. Resembles an apricot, but with a distinctive flavor and texture all its own. High taste-test scores – one of the most flavorful early season fruits. Early June harvest. Less than 300 hours. Self-fruitful, but biggest crops if pollinated by any apricot.

**APRIUM® LEAH-COT** Larger size Aprium with deep orange color. Reliable annual bearer, high flavor. 500 hours. Harvest late June. Self-fruitful.

**APRIUM® SUMMER DELIGHT** Late-season Aprium, ripening from late July-early August. Reliable bearer with great apricot flavor and very juicy -flesh. Self-fruitful. 500 hours

**PLUERRY SWEET TREAT** Plum x Cherry cross. A new fruit type with the sweetness of a cherry and fresh plum flavor. Fruit is larger than a cherry and smaller than a plum. Prolific producer, the fruit will hang on the tree for over a month. Pollinated by Burgundy plum.

**PLUERRY CANDY HEART** Plum x Cherry cross. A new fruit type with the sweetness of a cherry and fresh plum flavor. Fruit is larger than a cherry and smaller than a plum. Prolific producer, the fruit will hang on the tree for over a month. Pollinated by Burgundy plum.

**PLUOT® DAPPLE DANDY** Dependable setter and taste test winner, great plum-apricot flavor. Ripe skin is maroon w/ yellow dapple. August harvest in Central Calif. 400-500 hours. Pollinated by Flavor Supreme pluot, Santa Rosa or Burgundy plum.

**PLUOT® FLAVOR GRENADE** Elongated green fruit with a red blush. Crisp texture and explosive flavor. Taste-test winner. Hangs on the tree for 4 to 6 weeks. Pollinize with a Japanese plum. 400 to 500 hours.

**PLUOT® FLAVOR KING** Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central Calif. Naturally small tree. 400-500 hours. Pollinated by Flavor Supreme, Santa Rosa, or Late Santa Rosa.

**PLUOT® FLAVOR QUEEN** Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, orange flesh. Prolonged harvest: mid-July thru August. 4-500 hours. Pollinized by early blooming Pluot or Burgundy Plum.

**PLUOT® FLAVOR SUPREME** Taste test winner. Plum-apricot hybrid with sweet, richly flavored, firm red flesh. Greenish-maroon mottled skin. June harvest in Central Cal, about 2 weeks before Santa Rosa. 700-800 hours. Pollinated by Santa Rosa, Late Santa Rosa, or other Pluot.

**PLUOT® SPLASH** Small to med sized red-orange fruit w/ very sweet orange flesh. Round to heart-shaped fruit is excellent fresh, dried, or in desserts. Upright tree sets large crops once established. 400 hours. Pollinizer required

**NECTARINE GARDEN DELIGHT MINIATURE (SPECIAL ORDER)** Large yellow freestone. Sweet, delicious, refreshing. Harvest mid-Aug in Central Cal. Heavy bearing 5-6 ft. tree, easily covered to protect from frost. 500 hours. Self-fruitful. *Must order by 11/1/17.*

**PEACH BONANZA MINIATURE (SPECIAL ORDER)** Popular yellow freestone large fruit is sweet, low in acid, with a mild, refreshing flavor. Mid to late June in Central Cal. 5-6 ft. tree. 250 hours or less. Self-fruitful. *Must order by 11/1/17.*

**PEACH GARDEN GOLD MINIATURE (SPECIAL ORDER)** Delicious yellow freestone, more vigorous than other miniatures. Later bloom, less susceptible to frost damage. Showy blossoms. 5-6 ft. tree. 600 hours. Self-fruitful. *Must order by 11/1/17.*

**PEACH GARDEN SUN MINIATURE (SPECIAL ORDER)** Yellow freestone, ripe one week after Elberta. Sweet, mild, low acid. 4-5 ft. tree. Showy blossoms. 500 hours. Self-fruitful. *Must order by 11/1/17.*

**PEACH PIX ZEE MINIATURE (SPECIAL ORDER)** Large fruit ripens mid to late June in Central Cal, Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. 500 hours. Self-fruitful. *Must order by 11/1/17.*

## NUTS

**ALMOND**

**ALL-IN-ONE GENETIC SEMI-DWARF ALMOND (AVAILABLE POTTED ONLY)** No.1 almond for home orchards. Heavy crops

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 [www.frontyardnursery.com](http://www.frontyardnursery.com)  
(17)

of soft-shelled nuts with sweet flavorful kernels. Hot summer required to ripen. 15 ft. tall tree. Very frost hardy. 500 hours. Self-fruitful.

**SPECIAL ORDER ALMONDS**

The following are Special Order Fruit Trees (SOFT). There is a small increase in price for these trees and they *must be pre-ordered with us by November 1, 2017*. Please ask a sales associate for more information. o Discounts on SO.

**GARDEN PRINCE GENETIC DWARF ALMOND (SPECIAL ORDER)** Compact, lushly foliated 10-12ft. tree. Soft shell, kernels especially sweet and tasty. Bears young and heavy. Large, light pink blossoms. 250 hours. Self-fruitful. *Must order by 11/1/17.*

**BUTTE ALMOND (SPECIAL ORDER)** The most productive almond variety. Well-sealed, semi-hard shell. Medium-sized, vigorous, spreading tree similar to Neplus. 500 hours. Pollinizer required: interfertile with Mission, All-in-One, Nonpareil. *Must order by 11/1/17.*

**CARMEL ALMOND (SPECIAL ORDER)** Excellent Pollinizer for Nonpareil. High quality kernels; well-sealed nut keeps well. Young trees set heavy crops. 400 hours. Pollinizer required. *Must order by 11/1/17.*

**MISSION ALMOND (SPECIAL ORDER)** Late-blooming, productive tree. Hard-shell nut with short, plump kernel. Interfertile with All-In-One, Nonpareil, Price, Carmel. 500 hours. Pollinizer required. *Must order by 11/1/17.*

**NEPLUS ULTRA ALMOND (SPECIAL ORDER)** Large soft-shelled nut. Long, broad, flat kernel. Spreading tree. Pollinizer for Nonpareil in Northern California. 250 hours. Pollinizer required. *Must order by 11/1/17.*

**NONPAREIL ALMOND (SPECIAL ORDER)** No. 1 commercial almond, the standard of quality. Interfertile with Price, Mission, All-In-One, Carmel. (Neplus in Northern California only.) 400 hours. Pollinizer required. *Must order by 11/1/17.*

**PEERLESS ALMOND (SPECIAL ORDER)** Attractive hard shell; the leading in-shell variety. Blooms early, with Neplus. Medium-sized, upright tree. 400 hours. Pollinizer required: Neplus, Nonpareil. *Must order by 11/1/17.*

**PRICE ALMOND (SPECIAL ORDER)** Excellent Pollinizer for Nonpareil. Blooms and harvests same time as Nonpareil, nut is very similar. Small, heavy bearing tree. 400 hours. Pollinizer required. *Must order by 11/1/17.*

**CHESTNUT**

**COLOSSAL CHESTNUT** Thought to be a hybrid of the Asian and European chestnuts. High quality medium to large sized nuts fall easily from the hull, are easy to peel. Large, long-lived, spreading tree. 400-500 hours. Pollinated by Colossal or Nevada seedling.

**NEVADA CHESTNUT** Pollinizer for the Colossal - also a good producer. One Nevada pollinates 8-10 Colossal trees. Not tolerant of alkaline soil. 500 hours. Pollinated by Colossal.

**FILBERT**

**ETA FILBERT (Hazelnut)** One of the newest, disease-resistant introductions from Oregon State University, Eta produces abundant crops of tasty, medium-size nuts. Plant with Jefferson for cross-pollination.

**JEFFERSON FILBERT (Hazelnut)** Latest release from Oregon State with immunity to Eastern Filbert Blight Disease. Produces a heavy yield of large flavorful nuts that fill their shells well. A late bloomer. Cross-pollinate with Eta.

**PECAN**

Check with us we  
may have some in  
stock

**MOHAWK PECAN (AVAILABLE POTTED ONLY)** Very large, thin-shelled nut, excellent quality. Earliest maturing, so more widely adapted than others. Attractive tree is vigorous, bears young and heavy. Good choice for home planting. 250 hours. Self-fruitful. . Estimated **Ready Date: August 2018. See note page 21.\***

**WESTERN SCHLEY PECAN (AVAILABLE POTTED ONLY)** Easy to grow, hardy tree. Less fussy about soil & nutrition. Long, tapered, medium-sized thin-shelled nuts. Fine quality, mid-season. 250 hours. Self-fruitful. **Estimated Ready Date: August 2018 – See note on page 21\*.**

**PISTACHIO**

**KERMAN FEMALE PISTACHIO (AVAILABLE POTTED ONLY)** Long hot summers required to ripen. Do not disturb root ball when handling and planting. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollinated by Peters.

**PETERS MALE PISTACHIO (AVAILABLE POTTED ONLY)** Pollinizer for Kerman. Does not bear fruit. One Peters pollinates up to eleven females (Kerman). Do not disturb root ball when handling and planting. Drought-resistant once established. 800 hours.

**WALNUT**

*All Walnuts are on No. Calif. Black Walnut*

**CARMELO WALNUT** Late leafing and blooming, adapted to colder climate than Hartley or other popular English walnuts. Very large, well filled nut. 700 hours. Self-fruitful.

**CHANDLER WALNUT** Developed by UC Davis. Heavy bearing, high quality light-colored nuts. Good choice for backyard tree. Fall harvest. 700 hours. Self-fruitful.

**COOKE'S GIANT SWEET WALNUT NEW THIS YEAR!** Excellent walnut for planting in the backyard. It is very productive, with slightly mild flavors, and makes a very large nut. Prolific grower, and generally ripens in the month of September.

**FRANQUETTE WALNUT** Last English walnut to leaf out, less susceptible to spring frost damage. Very large tree, excellent for shade. Fair production of well-sealed, thin-shelled, high quality nuts. Pollinizer for Hartley. 700 hours. Self-fruitful.

**HARTLEY WALNUT** Long-time no. 1 walnut in California for its quality and dependability. Large, thin-shelled, well-sealed nut. Light colored flavorful kernel. 700 hours. Self-fruitful.

**IDAHO WALNUT** Very large, sweet, excellent eating nut, good quality. Extremely hardy variety withstands extreme cold. Vigorous growth. 300-700 hours. Self-fruitful.

**NORTHERN CALIFORNIA BLACK WALNUT** Medium sized nut tree, a native. Heavy bearing. Great shade tree too. Self-fruitful.

**KIWI**

**ISSAI KIWI (AVAILABLE POTTED ONLY)** Fuzzless fruit: no need to peel. Smaller than the standard kiwi, often sweeter. Very high in vitamin C. Much more winter hardy than Hayward. New growth tender to frost, but plant recovers quickly. Often set fruit the first year. Issai is self-pollinating, but not self-fertile. More fruit yield and larger fruit with a male pollinator

**KEN'S RED FEMALE KIWI (AVAILABLE POTTED ONLY)** Fruits turn red when ripe. Flesh is red, mild and very sweet. Needs male to ensure fruit set. Low-chill variety. One of the largest hardy kiwis. Space 10' to 15' apart on 6' tall trellis.

**HARDY MALE KIWI (AVAILABLE POTTED ONLY)** Can survive very low temperatures (hardy). Male is needed for female plant to produce fruit. One male can pollinate several female plants. A pretty vine on its own.

**GRAPES****WINE**

**CABERNET SAUVIGNON** Late season red wine grape, small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful.

**MERLOT GRAPE** Black berry, used for distinctive red wines. Best quality in cooler regions. 100 hours. Self-fruitful.

**PINOT NOIR GRAPE** Small black berries that yield the famous French Burgundy wines. Requires cool summers, cane pruning. Early harvest. 100 hours. Self-fruitful.

**SAUVIGNON BLANC** Small, oval greenish grapes on a vigorous growing vine. Strong, distinct flavor used for white table wine or blending. Ripens mid-August to early September.

**SYRAH GRAPE** This reddish black grape produces full, rich wines of intense color and flavor. Ripens mid-season (Sept.). Self-fruitful.

**ZINFANDEL GRAPE** For fruity red wines. Medium size, round, juicy, reddish-black berry, early mid-season. Prefers mild winters, cool summer. Heavy bearing. 100 hours. Self-fruitful.

Continuing Price Breaks for 2018: buy 10-19 Trees, get 10% off – buy 20-99 Trees, get 15% off – Buy 100 or more get 20% off. See Back Page for Details and Exclusions. 5801 Mother Lode Drive, Placerville (530) 626-3494 [www.frontyardnursery.com](http://www.frontyardnursery.com)

**TABLE**

**BLACK MONUKKA SEEDLESS GRAPE** Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Fresh or raisins. Early mid-season. 100 hours. Self-fruitful.

**CANADICE SEEDLESS GRAPE** Red, very sweet, medium-sized fruit. For fresh use or raisins. Ripens in August. . 100 hours. Self-fruitful.

**CONCORD SEEDLESS GRAPE** American grape, a sport Concord. Berries very similar to Concord, but seedless (or seeds very rare). Bluish-black skin, green flesh, distinctive Concord flavor. 100 hours. Self-fruitful.

**FLAME SEEDLESS GRAPE** Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens early, before Thompson. Vigorous. 100 hours. Self-fruitful.

**GOLDEN MUSCAT GRAPE (AVAILABLE POTTED ONLY)** Large, egg-shaped berries are pale golden yellow when ripe. Characteristic European Muscat flavor and aroma. 100 hours. Self-fruitful.

**PERLETTE SEEDLESS GRAPE** Pale green berry is crisp and juicy. Larger than Thompson and 2 weeks earlier. Requires less summer heat than Thompson to ripen. 100 hours. Self-fruitful.

**PRINCESS GRAPE NEW THIS YEAR! (AVAILABLE POTTED ONLY)** Seedless grapes are large, green color, juicy seedless fruit with a nice sweet flavor. Fruits hold well, eat fresh and as raisins. 100 Chill Hours. Self-fruitful.

**THOMPSON SEEDLESS GRAPE** Most popular grape in Calif. & Arizona. Fresh & raisins. Pale green, very sweet. Thin the clusters for larger berries. Needs plenty of heat. 100 hours. Self-fruitful.

**BERRIES****BLUEBERRIES**

**BLUECROP BLUEBERRY (AVAILABLE POTTED ONLY)** No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, flavorful fruit doesn't drop or crack. Tolerates hot summers if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

**BLUERAY BLUEBERRY (AVAILABLE POTTED ONLY)** Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. Blueberry culture requires soil that is moist, acidic, and high in humus. 800 hours. Self-fruitful. Ripens early to mid-season.

**CHANDLER BLUEBERRY** Extremely large fruit (almost the size of a cherry). Mid to late season harvest, will continue producing over a six week period.

**ELLIOT BLUEBERRY (AVAILABLE POTTED ONLY)** Heaviest bearing variety, and latest to ripen. Medium size berries, slightly

tart, will not crack or drop. Upright, vigorous bush. Tolerate hot summer if soil is moist, acidic, and high in humus. 800 hours. Self-fruitful.

**JUBILEE BLUEBERRY (AVAILABLE POTTED ONLY)** Midseason. Jubilee bushes are upright and quite compact, with fruit borne on the outer periphery of the bush. 500-700 hours.

**LEGACY BLUEBERRY (AVAILABLE POTTED ONLY)** Late mid-season. Vigorous, upright, high yielding variety that is very consistent yearly. Medium-sized fruit with a very superior flavor and sweetness. Self-fruitful, but plant two varieties for biggest crops.

**MISTY BLUEBERRY (AVAILABLE POTTED ONLY)** Southern Highbush (low chill requirement, tolerates heat). Excellent flavor, early harvest. Does well in inland heat. Blueberry culture requires soil that is moist, acidic, and high in humus.

**O'NEAL BLUEBERRY (AVAILABLE POTTED ONLY)** Southern Highbush (low chill requirement, tolerates heat). Large fruit is especially sweet and flavorful. Early season. Soil must be high in humus. 5-6 ft. bush. 200 hours. Self-fruitful, but plant 2 varieties for biggest crops.

**PATRIOT BLUEBERRY** Cold-hardy, early season blueberry with consistent crops. Low-growing, adaptable to many soil types.

**PINK LEMONADE BLUEBERRY (AVAILABLE POTTED ONLY)** An interesting new variety that bears translucent white berries which mature to bright pink when ripe. Sweet, firm fruit with nice texture.

**SOUTH MOON BLUEBERRY (AVAILABLE POTTED ONLY)** Early season. Southern Highbush variety, vigorous grower. Soil must be high in humus. Chilling requirement is 500 hours. Self-fruitful, but plant 2 varieties for biggest crops.

**TOP HAT BLUEBERRY (AVAILABLE POTTED ONLY)** Similar in shape to a mound-shaped spiraea. Beautiful plant form with fine quality berries. Great ornamental for planters or walkways.

**GOJI BERRY**

Oblong, bright red berries that are sweet and tart, known for their antioxidant and vitamin C qualities. The plant is trailing and easy to maintain. Likes sun to part sun with regular watering. Self-fruitful.

**CURRENTS**

Variety to be determined.

**BLACKBERRIES**

**APACHE** Thornless with large perfectly shaped berries. Heavy producer. Likes heat. Ripens late June.

**BLACK SATIN** (Thornless) Medium to large. Black, Honey sweet flavor. Vigorous grower, excellent for home gardens. New, heavy-yielding semi-erect thornless type, with improved quality and hardiness. Rarely suckers, very disease resistant. Ripens in July.

**CHESTER** (Thornless) Large fruit with very good flavor. Sweet, high quality, and firm. Will not soften, leak, or lose color in hot weather. Late season producer with a very long production season.

**DIRKSEN** (Thornless) Large black fruit with excellent quality and flavor, and high sugar content. Resistant to anthracnose. Ripens early July.

**LOGANBERRY** (Thornless) Medium-large (1 1/4" long, 3/4" thick). Lavender-red berry. Does not darken while ripening. Soft, tart, or sour fruit because of high acidity. Excellent for pies, juice, canning and wine making. Ripens in June.

**MARION** Medium to large. Fruit is bright red, firm, very flavorful. Produced on vigorous, trailing canes. Suitable for home freezing and canning. Leading variety in Pacific Northwest. Ripens mid-July to mid-August.

**OLALLIE** Large (1 1/2" long, 3/4" thick) shiny black, firm berry. Sweeter and less tart than others. Vigorous grower, very productive. Hardy to 10 degrees F. Low chill requirement. Commercially planted in California for market. Ripens late May to early July.

## BOYSENBERRIES

**BOYSENBERRY** (Thornless) Medium reddish-black berry. A less vigorous grower with lower fruit yields compared to Regular Boysenberry. Good for mild winter areas. Popular with home owners because its thornless. Ripens in June.

**BOYSENBERRY** (Regular) Large (1.5" long, 1" thick) non-shiny reddish-black colored berry. Soft, very juicy, sweet-tart berry. Good for canning, freezing, and eating fresh. Ripens in June.

## RASPBERRIES

**ANNE RASPBERRY NEW THIS YEAR!** (AVAILABLE POTTED ONLY) Large-fruited fall bearer that ripens at the same time as Heritage. Fruit holds a pale yellow color and is highly productive.

**BABA RED RASPBERRY** (AVAILABLE POTTED ONLY) The well-known ever-bearing "Bababerry." Large red berries up to 1", highly regarded for flavor. Much more tolerant of summer heat than other raspberries. Plentiful June harvest followed by smaller crop in fall.

**CANBY RED RASPBERRY** Medium to large. Light red berry. Firm, sweet, and excellent for fresh use or freezing. Vigorous canes. Moderate winter hardiness. Likes cooler summers. Nearly thornless. High level of virus & aphid immunity. Ripens in June.

**FALL GOLD RASPBERRY** This ever-bearing variety is sweet and large with golden yellow color. It is a winter hardy selection that harvests in July through the summer months.

**HERITAGE RASPBERRY** (AVAILABLE POTTED ONLY) (Red) Large, very firm, excellent quality. Moderate early July crop and heavy production of quality early September fruit. An ever-bearing variety with good vigor, hardy canes which do not need staking. The No. 1 fall variety nationwide.

**JEWELL BLACK RASPBERRY** (AVAILABLE POTTED ONLY) Strong producer of flavorful, medium to large berries. Very adaptable. Early season, beginning in late May to early June depending on climate. Upright habit, no support required. Good disease resistance.

**LATHAM RASPBERRY NEW THIS YEAR!** The firm fruit is easy to pick, red with a sweet flavor. Begins bearing its fall crop 2 to 3 weeks before Heritage.

**NOVA RED RASPBERRY NEW THIS YEAR!** Medium size dark red fruit. Mild flavor. Firm when ripe. Bears early May, June. Disease resistant, very cold hardy. Few thorns. Self fruitful.

**WILLAMETTE RED RASPBERRY** (AVAILABLE POTTED ONLY) Tasty, dark red fruit that ripens in mid-summer. Needs well drained soil and mild winters. Popular commercial variety.

## STRAWBERRIES

**ALBION STRAWBERRY** (Everbearing) Known for its very large fruit and conical shape. Pleasant, sweet flavor. Resistant to verticillium wilt and crown rot.

**CAMAROSA STRAWBERRY** This short day variety produces large, bright, firm and flavorful fruit. Ships and stores well when picked at full color. Early producer.

**CHANDLER STRAWBERRY** (June bearing) Very large, medium red, glossy, attractive finish. Long conical to long wedge shaped. High yielding. Excellent quality fruit, much firmer than Douglas. Excellent coastal variety. Adapted to winter and summer plantings.

**TRISTAR STRAWBERRY NEW THIS YEAR!** (Everbearing) Firm, sweetly aromatic, large glossy red berries with excellent flavor. Will bear fruit from summer to fall.

## **SMALL VEGGIES & FRUIT**

**JERUSALEM ARTICOKES** Perennial. Produces edible tubers which are good in salads, boiled, or in soups. Plants good for landscaping, making a high hedge in one season. Ripens fall.

**ASPARAGUS (U.C. 157)** Perennial vegetable. Plants take 2-3 years to come into full production, then furnish delicious spears every spring for 10-15 years. Tall, feathery, graceful, highly ornamental plants. U.C. 157 produces earlier, is more uniform in color and size, more productive than other varieties.

**JERSEY KNIGHT ASPARAGUS** Prolific all-male strain. Spear tips stay tight past the harvest, for weeks of delectable eating. Super tender. Rust resistant. Performs even in heavy clay soil.

**HORSERADISH** Large, coarse herb cultivated for its roots as a relish. Harvest roots in winter or spring. Mature plant is 3'x 5'.

**VICTORIA CHERRY RHUBARB** (Seedlings) Vigorous, deep red, heavy thick stalks. Tart flavored, succulent. Great for pies, sauces, and canning. Perennial. Some variation in coloring will be seen from plant to plant.

## ORNAMENTAL TREES

**AUTUMN BLAZE MAPLE** *Acer x freemanii 'Autumn Blaze'*  
Dense, oval shaped canopy, green foliage. Fall color is brilliant orange-red. Reaches 50' x 40'. Sunset zones 1-9, 14-24.

**OCTOBER GLORY MAPLE** *Acer rubrum 'October Glory'*  
Nearly round canopy, glossy green foliage. Better suited to mild winter and hot summer climates than other maples. Showy red fall color. Ample soil moisture required. Reaches 40'x 35'. Sunset zones 1-9, 14-24.

**RED SUNSET MAPLE** *Acer rubrum 'Red Sunset'* Upright growth to 40'. Oval shaped canopy, glossy dark green leaves, bright red or orange-red fall color. Ample soil moisture required. Sunset zones 1-9, 14-17.

**QUAKING ASPEN** *Populus tremuloides* Very distinctive tree - light green round leaves flutter and shimmer in the slightest breeze. Fast growing, 30' tall, 15' wide. Smooth bark, light grayish to white. Bright yellow fall color. Sunset zones 1-7.

**KRAUTER VESUVIUS FLOWERING PLUM** *Prunus cer. 'Krauter Vesuvius'* Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree, 18' high, 12' wide. Favorite purple-leaf plum for California. Foliage of newly planted tree sometimes greenish until vigorous growth begins.

## VINES & SHRUBS

**HOPS CASCADE** *Humulus lupulus 'Cascade'* (AVAILABLE POTTED ONLY) Traditional American aroma hop, used in brewing beer. Well drained soil, full sun. Deciduous vine.

**HOPS CENTENNIAL** *Humulus lupulus 'Centennial'* (AVAILABLE POTTED ONLY) Classic American aroma hop, used in brewing beer. Similar to Cascade but more intense. Well drained soil, full sun. Deciduous vine.

**WISTERIA BLUE** *Wisteria sinensis 'Blue'* Lightly fragrant blue flowers. Spring bloom, and again late summer. Fast growth 25-30 ft. long. Sun or part shade. Deciduous vine. Will bloom in considerable shade.

**WISTERIA COOKE'S PURPLE** *Wisteria sinensis 'Cooke's Purple'* Lightly fragrant purple flowers. Spring bloom, and again late summer. 25-30' long. Full sun, part shade. Deciduous vine.

**WISTERIA PINK** *Wisteria sinensis x floribunda 'Rosea Beni Fugi'* 12" fragrant pink flowers in spring. 25-30' long. Full sun, part shade. Deciduous vine.

**WISTERIA WHITE** *Wisteria floribunda "Longissima Alba"* 12" fragrant white flowers in spring. 25-30' long. Full sun, part shade. Deciduous vine.

## CONIFER TREES

**DOUG FIR BLUE** *Pseudotsuga menziesii glauca* 50 ft. tall, 20-30 ft. wide. Full sun or light shade. Sunset zones 1-10, 14-17.

**WHITE FIR** *Abies concolor* 80-120 ft. tall, 30-50 ft. wide. Filtered sun or afternoon shade. Sunset zones 1-9, 14-24.

**\* POTTED FRUIT TREE NOTES: Some of our fruit trees must be potted and sold once the tree has fully rooted; for Mulberries and Pecans this is around August. This gives certain fruit and nut tree varieties the best chance of success, cuts down on stress to the tree when transplanted and helps to ensure a healthy and thriving product. You can order your tree now and it will be held for you until it is fully rooted in its pot.**
